NORTHWEST, INC.,	)	
	)	
For Assignment of Telephone	)	ORDER ASSIGNING NUMBERING
Numbering Resources	)	RESOURCES
.....	)	

**BACKGROUND**

- 1 Frontier Communications Northwest, Inc., (Frontier or Company) requested on September 27, 2010, that the Washington Utilities and Transportation Commission (Commission) overturn the Number Pooling Administrator’s decision to withhold numbering resources and direct the Number Pooling Administrator to provide five blocks of 1,000 numbers in the 425 Numbering Plan Area (NPA), Everett rate center. On October 19, 2010, the company modified this request after determining that 2,000 of the requested numbers are not needed within the next six months. The revised request is being made to meet the requirements for a customer’s need for 3,000 numbers immediately and 2,000 numbers on “reserve” for future use that fall within its internal business dialing plan. The 3,000 numbers will be used to expand its current location by January 2011. An additional 2,000 numbers that fall within the customers dialing plan are requested to be put in “reserve” status for future growth. The customer is a nonprofit business serving the community of interest.
  
- 2 Telephone companies commonly hold and manage a reasonable inventory of telephone numbers in the areas where they provide service. When more numbers are needed by a company, it may request them from the Number Pooling Administrator. The Number Pooling Administrator withholds telephone numbers if the company’s inventory is sufficient for the next six months and there is a shortage of numbers in the affected area code.
  
- 3 The Number Pooling Administrator’s Web site reports an inventory of 62 blocks of 1,000 numbers in the Everett rate center, and the North American Numbering Plan Administrator’s (NANPA’s) Web site reports that the 425 NPA is forecasted to exhaust in the 4th quarter of 2031. The Company’s inventory is deemed sufficient by NANPA for the next six months. Frontier provided the Commission with a detailed inventory for

number resources and proof of utilization<sup>1</sup> in the rate center. Frontier will adhere to the requirement to review numbering resources and comply with the requirements of the NANPA and the Pooling Administrator regarding the return of unused numbers.

- 4 The Federal Communications Commission (FCC) issued an order establishing a “safety valve” allowing companies that do not meet the utilization threshold in a given rate center to obtain additional numbering resources apart from the general waiver process.<sup>2</sup> Specifically, the FCC granted to state Commissions the authority to direct the Number Pooling Administrator to release a block of numbers to a company to satisfy a specific customer request that cannot be met with the company’s current inventory<sup>3</sup> provided the company documents the customer request and submits current proof of utilization.
- 5 Frontier has received a request from a customer needing 3,000 sequential telephone numbers immediately and ultimately needing 5,000 sequential numbers. The available blocks of numbers in the Everett rate center will not meet the sequential telephone number requirements of the customer.

### FINDINGS AND CONCLUSIONS

- 6 (1) The Washington Utilities and Transportation Commission is an agency of the State of Washington vested by statute with the authority to regulate the rates, rules, regulations, practices, accounts, securities, transfers of property and affiliated interests of public service companies, including telecommunications companies. *RCW 80.01.040, RCW 80.04, RCW 80.08, RCW 80.12, RCW 80.16 and RCW 80.36.*
- 7 (2) Frontier is a telecommunications company and a public service company subject to Commission jurisdiction.
- 8 (3) The Telecommunications Act of 1996 (the Act) allows the FCC to establish rules to implement the Act and delegate authority to state Commissions.

<sup>1</sup> Third Report and Order, FCC 01-362, CC Dockets 96-98 and 99-200, paras. 52-56.

<sup>2</sup> *In the Matter of Numbering Resource Optimization*, Third Report and Order and Second Order on Reconsideration, CC Docket 99-200, FCC No. 01-362, ¶¶ 57-66 (Rel. December 28, 2001).

<sup>3</sup> *Id.* ¶ 64.

- 9 (4) The FCC has created a “safety valve” mechanism within the framework of number resource management and delegated to the Commission authority to grant requests by companies that receive a specific customer request for numbering resources that exceeds their available inventory. The FCC has also given states some flexibility to direct the Number Pooling Administrator to assign additional numbering resources to companies that have demonstrated a verifiable need for additional numbering resources.<sup>4</sup>
- 10 (5) The Commission has jurisdiction over this matter pursuant to RCW 80.36.610, which authorizes the Commission to take actions necessary to implement the Act.
- 11 (6) Normally, additional numbering resources are granted only when existing resources are forecasted to exhaust within six months.<sup>5</sup>
- 12 (7) The Number Pooling Administrator’s Web site reports an inventory of 62 blocks of 1,000 numbers in the Everett rate center, and the NANPA’s Web site reports that the 425 NPA is forecasted to exhaust in the 4th quarter of 2031.
- 13 (8) The request is being made to meet the requirements for a customer’s need for 3,000 numbers that fall within its internal business dialing plan. These numbers will be used to expansion its current location by January 2011. An additional 2,000 numbers that fall within the customers dialing plan is requested to be put in “reserve” status for future growth. The customer is a nonprofit business serving the community of interest.
- 14 (9) This matter came before the Commission at its regularly scheduled meeting on October 28, 2010.

## ORDER

### THE COMMISSION ORDERS:

- 15 (1) The Number Pooling Administrator is directed to release three blocks of 1,000 numbers and reserve two blocks of 1,000 numbers, specifically in the 425 NPA,

---

<sup>4</sup> *Id.*, ¶ 61.

<sup>5</sup> 47 *CFR* 52.15(g)(3)(iii).

Everett rate center to Frontier Communications Northwest, Inc.

- 16 (2) The Commission retains jurisdiction over this matter to take such future actions as may be appropriate.

The Commissioners, having determined this Order to be consistent with the public interest, directed the Secretary to enter this Order.

DATED at Olympia, Washington, and effective October 28, 2010.

**WASHINGTON UTILITIES AND TRANSPORTATION COMMISSION**

**DAVID W. DANNER, Executive Director and Secretary**

**NOTICE:** This is an order delegated to the Secretary for decision. In addition to serving you a copy of the decision, the Commission will post on its Internet Web site for at least 14 days a listing of all matters delegated to the Secretary for decision. You may seek Commission review of this decision. You must file a request for Commission review of this order no later than fourteen (14) days after the date the decision is posted on the Commission's Web site. The Commission will schedule your request for review for consideration at a regularly scheduled open meeting. The Commission will notify you of the time and place of the open meeting at which the Commission will review the order.

The Commission will grant a late-filed request for review only on a showing of good cause, including a satisfactory explanation of why the person did not timely file the request. A form for late-filed requests is available on the Commission's Web site.

This notice and review process is pursuant to the provisions of RCW 80.01.030 and WAC 480-07-904(2) and (3).
