RE: Non-compliance letter for Bow Lake Master Meter System

Dear Ms. Johnson:

I have made numerous attempts to Daryl Hong of Puget Sound Energy to provide Bow Lake with documented verification that the gas they provide us has the proper concentration of odorant and that the pressure regulator station maintenance was done. I have not received any documentation.

Since my requests for the documentation have only been over the phone, I figure maybe if I make the requests in writing they may be forced to respond. Therefore I am asking you to provide me with the contact names and addresses of the proper Puget Sound Energy personnel who will be able to accomplish this task.

Also you or somebody at the commission should be able to give me the name of someone to contact regarding turning over our gas system to Puget Sound Energy. Helge Ferchert did not answer my phone calls and I understand he is no longer in the same position. Names and addresses would be preferable since I figure I will have to make my inquiries in writing. We are very serious about turning over this system to Puget Sound Energy.

Thanks,

A handwritten signature in black ink, appearing to read "Bob Mayfield", written over the typed name.

Bob Mayfield, Mgr.
