SCHEDULE 95

MY CLEAN ENERGY PROGRAM – WASHINGTON

AVAILABLE:

To Customers in the State of Washington where the Company has electric service. Customers may participate in one or more available Renewable Energy Credit (REC) program options.

APPLICABLE:

To all customers receiving electric service who agree to participate in a program option under this schedule.

PROGRAM OPTIONS AND CHARGES:

Clean Energy program options available to customers will utilize the types of qualifying resources (including wind, solar, biomass), as defined in RCW 19.29A.090(3). Program options available to Washington customers will include, but are not limited to the following:

National Block Option - One (1) block is equal to 100 kWh of renewable power from a National source located anywhere in the United States. Each block is priced at \$1.00 per block, per month.

C

Regional Block Option - One (1) block is equal to 100 kWh of renewable power from a Regional source located in the Western Interconnection (WECC), with preference given to the northwest region including WA, ID, OR, CA, MT, and BC. Each block is priced at \$1.30 per block, per month.

I

100% Renewable Option – One (1) kWh of renewable power from a Regional source located in the Western Interconnection (WECC), with preference given to the northwest region including WA, ID, OR, CA, MT, and BC will offset every kWh used at customer selected meter. Each kWh is priced at \$0.013/ per kWh and the amount of kWhs purchased will vary each month to match the customers actual kWh usage.

I

All program charges shall be in addition to all other charges contained in the customer’s applicable tariff schedule.

MONTHLY BILLING:

National and Regional block options- The monthly billing shall be the number of Blocks the customer has agreed to purchase multiplied by the Charge per Block. The Monthly Billing is in addition to all other charges contained in customer’s applicable tariff schedule.

Issued October 18, 2021

Effective January 01, 2022

SCHEDULE 95 – Continued

This schedule’s Monthly Billing shall be applied to the customer’s billing regardless of actual energy consumption.

100% Renewable Option - The monthly billing shall be based on the customer’s actual electric usage at the meter selected by the customer. For every kWh of electricity used, the customer will be charged \$0.013/kWh premium for renewable power. The Monthly Billing is in addition to all other charges contained in the customer’s applicable tariff schedule.

**RENEWABLE POWER:**

For the purpose of this schedule, the renewable power sourced through renewable energy certificates (RECs) shall be recognized via the Western Renewable Energy Generation Information System (WREGIS) tracking system or another REC tracking system of record with preference toward Green-e certified and primarily from these sources: Wind and solar power, but may also come from other qualified alternative energy resources, as defined in RCW 19.29A.090(3).

PROGRAM ADMINISTRATION:

To ensure that all costs and benefits of this program are only applied to program participants, all funds collected and spent under this schedule will be separately identified and tracked. Funds may include program costs (e.g.: program management, accounting, communications, etc.) as well as to match block subscriptions to REC purchases.

**RENEWABLE ENERGY PROJECTS/GRANTS:**

In an effort to promote local project development and build awareness of renewable energy generation options, if available, funds collected but not otherwise required to meet program obligations may be distributed for one or more of the following renewable projects:

1. Funding for locally-owned, non-residential solar projects. Customers may apply for a grant to cover all or a portion of the cost of the project. Minimum program eligibility criteria include new installations on non-residential building sites with a preference given to educational institutions and/or non-profit buildings in Avista’s Washington electric service territory. This approach enhances educational and training opportunities for the public as well as the Company. In addition to minimum criteria, Avista at its sole discretion will evaluate applications based on; project feasibility and readiness, installation cost and financing, geographic distribution throughout Avista’s service territory, community exposure and educational benefits, and use of Washington-manufactured equipment.
