Question 8 – (WMC will provide.)

Question 9 - How do you currently estimate travel time back to home base after the job is complete?
(i.e. Google Maps, GPS, Etc.)

GPS

Question 10 – If you over or underestimate the travel time, do you perform a billing correction?

Yes No

Question 11 - Please provide the percentage of total HHG moves conducted on a weekend, Holiday, or before 8am of after 5pm Monday through Friday, for the calendar year 2021. 5 %

Question 12 - Tariff No. 15-C allows for overtime charges in ITEMS 50 and 190, which apply to the same time periods as moves that would require a 4-hour minimum. Please explain why a 4-hour minimum is necessary when these overtime charges are also allowed for moves that occur before 8am or after 5pm Monday through Friday or on weekends and holidays.

Given the low rates provided to regulated intra state carriers and our requirements for wage/benefits

a 4 hrs minimum is needed to insure employees are compensated correctly, as they could easily have worked

over 40 hrs that week. Should the UTC remove themselves from rate setting and let the market set the pricing to customers that would change my opinion. The cost to start up a truck and bring in a crew requires a 4hr min to be collected.
