ADDENDUM TO SEPTEMBER 22, 2025, RESOURCE ADEQUACY MEETING SUMMARY

RE: *Correction to Summary of the 2025 Long-term Resource Adequacy Meeting Issued on November 21, 2025*, Docket UE-210096

In the summary of the September 22, 2025, Long-Term Resource Adequacy Meeting issued November 21, 2025, in Docket UE-210096, the summary says at the bottom of page 7 that NEEA's End-Use Load Flexibility initiative "forecasts the project will deliver a 1-to-3-gigawatt resource to the region **within the next four years."**

The summary should have read, "NEEA's EULF is a four-year plan (2026-2029) to achieve a 1-to-3-gigawatt resource in the region **within the next twenty years."**

For more information on this initiative, please see End-Use Load Flexibility - Northwest Energy Efficiency Alliance (NEEA).
