

**UDIT PROVISIONING EXAMPLE:**

A CLEC has ordered an OC-12 UDIT from Qwest wire center A to Qwest wire center Z. Existing IOF facilities from A to Z are OC-3capable only. Possible alternate routes are evaluated for capacity. Note, routes between wire centers can measure hundreds of miles in length and there is potential for more than one alternate route. Engineer makes determination and Alternate Route 1 is provisioned for CLEC.

**E-UDIT PROVISIONING EXAMPLE:**

A CLEC orders an OC-3 E-UDIT from Qwest wire center Z to its location within the wire center boundary. Where spare loop facilities are available, Qwest will provision the E-UDIT to the customer location.
