

WASHINGTON UTILITIES AND TRANSPORTATION COMMISSION STAFF  
RESPONSE TO DATA REQUEST

DATE PREPARED:	October 31, 2014	WITNESS:	Jeremy Twitchell
DOCKET:	UE-140762, et al.	RESPONDER:	Jeremy Twitchell
REQUESTER:	Pacific Power	TELEPHONE:	(360) 664-1302

- 22 Is it Staff's position that the System Diversified Load Factor used for determining the classification between demand and energy reflects the capacity contribution for each of the following types of resources in the WCA portfolio?
- a. Coal plants
  - b. Natural gas plants
  - c. Hydroelectric facilities
  - d. Purchase power

**RESPONSE:** Yes, as long as purchase power refers to market purchases or PPAs from non-wind resources. Staff's position is that power purchased directly from a wind resource should be classified by the proposed NDG factor.
