Comments by James Adcock on U-210553 Decarbonization Pathways Engagement Plan June 2022

Docket number of this proceeding: U-210553

Commenting party's name: James Adcock, Electrical Engineer

The title and date of the comment or comments:

Comments Related to U-210553 Decarbonization Pathways Engagement Plan June 2022

6/7/2022

Looking at this document "Decarbonization Pathways Engagement Plan June 2022", it almost reads as-if public stakeholders [unless chosen as active participants] are being disinclined from submitting comments about many of the meetings and documents created by this process. If so, I think this would be a huge mistake. Historically UTC has permitted public comments about all public processes and documents, and I hope that tradition will continue to be upheld. Further, one might hope that SSG, UTC, and the Chosen Active Participants might actually read those comments and incorporate them into their thinking about these issues -- whether or not they personally agree with those comments. Otherwise, I would have concerns that the "Chosen Few" might spin out into "Group Think."

Thank you for your consideration,

James Adcock, Electrical Engineer, MIT
