Dear Ms. Omohundro:

Subject: Certificate of Public Convenience and Necessity

The Washington Utilities and Transportation Commission (Commission) received a request from Puget Sound Energy (PSE) for a Certificate of Public Convenience and Necessity for the Kittitas service area. Staff has reviewed each Docket for PSE's current service areas and noted a need to update the information. Staff is requesting PSE's assistance in confirming the accuracy of all PSE's service areas. A new Appendix Number will be assigned to PSE's Kittitas service area after the Commission completes a comprehensive review of the existing service areas. The two enclosed spreadsheets were compiled to organize existing Cause and Docket Numbers for PSE's certificated areas. Please review the information for accuracy. Several Appendix Numbers (or service areas) appear to be missing or have been canceled. It is also not clear from the chronology listing for a given Appendix Number (service area) if the Cause or Docket Numbers describe an addition to a service area or redefine the entire service area. Staff recommends simplifying the list of docket numbers for a certificate by consolidating Dockets for contiguous service areas or by Appendix Numbers. PSE's recommendations would be appreciated.

The Commission has been working with updating Cascade Natural Gas (CNG) service area maps of which PSE has received copies. CNG's maps show expansions to a given Appendix (service area) by outlining each expansion area and identify the area by a Cause or Docket Number. Legal descriptions were provided to the Commission for each expansion and redefined Appendix (service area) that included the new expansion area. Staff would appreciate a set of service area maps from PSE similar to the CNG's maps that identify service area expansion by Cause or Docket Numbers. The maps will document PSE's historical expansion for each Appendix (Service area) by Cause or Docket Number.
