

GENERAL AND LOCAL EXCHANGE TARIFF

RULES AND REGULATIONS

B. Definitions

Local Service Area

The area within which telephone service is furnished under a specific exchange rate. This area may include one or more exchanges without the application of toll charges.

Measured Usage

A separate charge applicable to each outgoing local message (local exchange and EAS). Usage charges are based on call frequency, duration, and intraexchange or interexchange (non-toll) with a single per minute rate applicable 24 hours a day, 7 days a week. Measured usage is provided in conjunction with Basic Calling Service. Premium Plus Measured Usage is based on call frequency and termination points as identified in Network Access Services, Section 4, Local Exchange Listings, Optional Local Calling Plans (OLCP)¹.

(N)

Message

A completed customer telephone call.

Mileage

Additional recurring charges based on distance measurement as provided in the tariff.

Minimum Contract Period

A minimum length of time for which a customer is obligated to pay for service, facilities, or equipment, whether or not retained by the customer for such minimum length of time.

Native American Lifeline²

Additional federal Lifeline and Link Up assistance for qualifying low-income individuals living on Native American tribal lands to reduce the cost of basic telephone service, initial connection charges and line extension charges. This program is in compliance with the FCC Twelfth Report and Order, CC-Docket 96-45 – Promoting Deployment of Subscribership in Underserved and Unserved Areas.

(T)

Network Access Line

A communications facility between the customer's premises and the serving central office, providing access to and from the telecommunications network.

¹ As of March 1, 2006, per minute usage is no longer charged for Premium Plus Measured Service.

(N)

² Program will be available on October 1, 2000.

(T)

GENERAL AND LOCAL EXCHANGE TARIFF

NETWORK ACCESS SERVICES

NETWORK ACCESS SERVICES

A. General

Network Access Service is provided through facilities owned and maintained according to the standards of the Company. The territory served is shown on maps filed with the Commission by the Company. This territory is divided into exchanges.

The application of business or residence rates is determined by the actual or obvious use made of the service by the customer. Where only one Network Access line is provided at a location which is both business and residence, the business rate will apply.

The Network Access Line rates do not include a telephone.

Customers must select either Basic Calling Service or Premium Calling Service with the exception of selected exchanges where Optional Local Calling Plans (OLCP) are also available. OLCPs are available at the same rate as Premium Calling service effective March 1, 2006. (N)
(N)

The Optional Local Calling Plans¹ offered are Premium Plus Flat or Premium Plus Measured and may be selected in lieu of Basic Calling or Premium Calling Service plans. The applicable OLCP charges are a monthly recurring charge (same rate as Premium Calling Service) and a Premium Plus Service Adder (flat or measured). If Premium Plus Measured Service is selected, the associated per minute Measured Usage Rates are not charged effective March 1, 2006. OLCPs are not available for Feature Group A (see Facilities for Intrastate Access Tariff, WN U-16, Section 4), Wide Area Telecommunications (WATS see Washington Price List, WAPL02), Public Access Line (PAL), Lifeline, Foreign Exchange (FX) or Coin Line Services. (N)
(N)

¹ Premium Plus calling areas will become local calling areas by September 1, 2006 in compliance with Order No. 7 in Docket No. UT-050814 dated December 23, 2005. (N)
(N)

GENERAL AND LOCAL EXCHANGE TARIFF

NETWORK ACCESS SERVICES

NETWORK ACCESS SERVICES

B. Conditions

Measured Usage Rates

Measured Usage rates represent costs associated with customer placement of local calls, including interexchange non-toll calls.¹ When a Measured Usage call is placed, the Initial Minute rate applies to the first minute or any fraction thereof after the connection is made. The Additional Minute rate applies to every minute or fraction thereof after the initial minute.

Customers subscribing to Basic Calling Service are subject to per minute Measured Usage rates for their applicable local (D)(N) usage.

For customers subscribing to Basic Calling Service, calls placed to points within the exchange area are billed the Exchange Initial and Additional Minute rates, regardless of distance.

Non-toll calls placed outside the exchange area are billed the Interexchange Initial and Additional Minute rates for customers subscribing to Basic Calling Service. (D)

Calls placed to points outside the local calling area are subject to the normal toll charges. The Company rates are found in the Washington Price List 2, Message Telecommunications Service.

Local calls placed from a line with Measured Usage will be billed the appropriate charges, as follows:

Direct dialed call

The customer will pay the Initial and Additional Minute rate for the duration of the call based on the type of call, Exchange or Interexchange non-toll.

¹ This includes Extended Area Service and Local Calling Plan traffic. (D)
