Comment: The PSE plan appears to be only designed to create great profits for the 2 alien owners. There is every reason to Not allow this project in the face of increasing climate changes and catastrophe. And also Please note the tension upon our coastal tectonic plates in which it is forecasted that we may have the biggest earthquake ever experienced that would be catastrophic for Any LNG plant surrounded by neighbor hoods in all directions. We all know that any plan that does not include Wind and Solar is the wrong way to go when President Kennedy went to the moon he did not work on tricycles - No - he went straight for his goal to the moon and did not waste valuable time and energy deflecting
