Comment: The urgency of a transition to renewable energy in order to avoid the catastrophic consequences of a warming climate must be taken into account while reviewing PSE's plans to continue using fossil fuels far beyond the timeline that scientists have said must be followed.

Comment: I am a PSE customer from Ellensburg, Washington. Many ~~of~~ Central & Eastern Washington residents are very disappointed by PSE's lack of responsible action ~~on~~ on renewable & clean energy production. I oppose any natural gas expansion & any pipeline production. Close Colstrip soon & go with clean, solar & wind energy to save us all money & save the planet. Your profits are ~~not~~ not the priority!
