Each facilities-based provider with fixed broadband connections to end users shall provide a list of total connections and consumer connections by census tract, along with the associated service characteristics.

For each census tract in which you have fixed broadband subscribers in service and for each service offering you sell:

- Enter the total number of connections and the number of connections you provide to consumers.
- Rows must be unique by census tract and service offering (the State, County and Tract together uniquely define a particular census tract and the Technology, Downstream Bandwidth and Upstream Bandwidth together uniquely define a service offering).

Reminder

Report ethernet over fiber connections as "Optical Carrier / Fiber to the Premises" and ethernet over copper connections as "Copper Wire". Do not report these connections as "Other".
