

**Exhibit No. RCM-1T  
Dockets UE-090704 and UG-090705  
Witness: Roland C. Martin**

**BEFORE THE WASHINGTON STATE  
UTILITIES AND TRANSPORTATION COMMISSION**

**WASHINGTON UTILITIES AND  
TRANSPORTATION COMMISSION,**

**Complainant,**

**v.**

**PUGET SOUND ENERGY, INC.,**

**Respondent.**

**DOCKET UE-090704**

**DOCKET UG-090705**

**TESTIMONY OF**

**ROLAND C. MARTIN**

**STAFF OF  
WASHINGTON UTILITIES AND  
TRANSPORTATION COMMISSION**

*Revenue Requirement Adjustments, Mint Farm Deferral*

**November 17, 2009  
Revised December 11, 2009**

## EXHIBIT LIST

Exhibit No. RCM-2, Interest on Customer Deposits—Rate Base Impacts

Exhibit No. RCM-32, Analysis of Net Benefit Related to SSCM Deductions and Repayments

1 **Q. Do you present any adjustment for which there is no Company counterpart?**

2 A. Yes. Staff's proposed Adjustment 10.38, Amortization of Wild Horse Deferred  
3 Costs, has no Company counterpart and should be accepted for reasons I discuss  
4 later in this testimony.

5

6 **Q. Please summarize Staff's recommendation regarding the deferral of Mint Farm**  
7 **costs.**

8 A. Staff recommends that the Company's proposed deferral methodology should be  
9 approved by the Commission, except for the following elements of the proposal:

- 10 1. The Company's request to modify the Power Cost Adjustment ("PCA")  
11 mechanism by suspending Exhibit G of the PCA as to Mint Farm costs  
12 should be rejected.
- 13 2. The Company's proposal to apply a 7 percent net of tax interest rate to the  
14 deferred amounts should be rejected. Instead, no interest rate should be  
15 applied.
- 16 3. The Company's proposal to amortize Mint Farm deferred costs over  
17 three years should be rejected. Instead, a 15-year amortization period  
18 should be used.

19

20 **Q. Have you prepared any exhibits in support of your testimony?**

21 A. Yes, I have prepared the following exhibits in support of my testimony:

22 • ~~Exhibit No. RCM-2, Interest on Customer Deposits - Rate Base Impacts~~

- 1           • Exhibit No. RCM-32, Analysis of Net Benefit Related to SSCM Deductions  
2           and Repayments  
3

4                                   **III. DISCUSSION**

5  
6   **A. Uncontested Ratemaking Adjustments**

7  
8   **Q. Please briefly describe the adjustments that you determined to be uncontested.**

9   A. Adjustments 10.29 and 9.22, Merger Savings, remove from the test year electric and  
10     gas results of operations certain expenses that will no longer be incurred during the  
11     rate year due to the merger with Puget Holdings LLC. These savings are allocated  
12     between the electric and gas operations, as detailed by PSE witness Stranik in  
13     Exhibit No. MJS-1T at page 27.

14           Adjustment 10.30, Storm Damage, reflects in the electric results of operations  
15     the appropriate storm damage expenses in accordance with prior rate case  
16     determinations. Company witness Story details this adjustment in Exhibit No. JHS-  
17     1T at pages 48 and 49.

18  
19   **Q. You listed as uncontested Adjustment 10.31, Regulatory Assets & Liabilities**  
20     **involving the White River Project regulatory assets. Is this a new deferred item**  
21     **that PSE added since the last general rate case?**

22   A. Yes.  
23

1 **Q. Does Staff contest the entirety of Adjustments 10.19 and 9.13, as proposed by**  
2 **PSE?**

3 A. No. Staff does not contest the interest expense adjustment, but disagrees with PSE's  
4 disparate application of the average balances of customer deposits to reduce rate base  
5 for the gas versus electric operations.

6  
7 **Q. Please explain Staff's position in more detail.**

8 A. For its electric operations, PSE treats the customer deposit balance as a direct offset  
9 to rate base.

10 In contrast, the gas treatment proposed by PSE uses the customer deposit  
11 balance to offset the total investor supplied working capital allowance that is  
12 allocated to gas, electric, and non-operating categories. This treatment unfairly  
13 denies gas ratepayers, who pay all the gas interest expense, the full benefit of a direct  
14 rate base reduction, and unreasonably provides electric and unregulated operations a  
15 portion of the benefits from the gas customer deposits.

16 Staff's proposed adjustments correct this unfairness by treating the gas  
17 customer deposit balance as direct gas rate base reduction in identical fashion with  
18 the electric treatment. The impacts of the direct reduction in gas rate base is  
19 \$6,973,756 and is reflected on Exhibit No. KHB-3, page 3.18 for PSE's gas  
20 operations. The change in treatment of the gas customer deposit balance also affects  
21 the level of the allocated electric, gas, and non-operating working capital allowance  
22 which is addressed by Staff witness Kermode in his testimony and exhibits. Staff's  
23 adjustments are a net reduction in gas rate base of \$5,344,758 and a net increase in  
24 electric rate base of \$4,846,474.

25  
26 ~~**Q. Have you prepared an exhibit showing Staff's calculation of the customer**~~  
27 ~~**deposit adjustments to rate base for the electric and gas operations?**~~

1 ~~A. Yes. Exhibit No. RCM 2 calculates the rate base impacts of Staff's proposed~~  
2 ~~customer deposit Adjustments 10.19 and 9.13. Staff's adjustments are also reflected~~  
3 ~~on Exhibit No. KHB 2, page 2.26 for PSE's electric operations and Exhibit No.~~  
4 ~~KHB 3, page 3.18 for PSE's gas operations.~~

5  
6 **2. Adjustment 10.31, Regulatory Assets & Liabilities Adjustment**  
7 **(Westcoast Pipeline)**  
8

9 **Q. Please explain contested Adjustment 10.31, Regulatory Assets & Liabilities**  
10 **Adjustment (Westcoast Pipeline).**

11 A. This adjustment relates to a regulatory credit of \$3.5 million received by the  
12 Company from FB Energy Canada Corporation (FB Energy) for PSE's assumption  
13 of contracted transportation capacity on West Coast Pipeline. The purpose of the  
14 Company's adjustment is to recognize the rate year average balance of the credit as a  
15 rate base reduction and the associated amortization. PSE began amortizing the credit  
16 on November 1, 2009, the effective date of the assumption of the pipeline capacity.  
17 PSE will continue the amortization over the remaining 9-year term of the contract.

18 PSE received the payment on October 24, 2008, the day after all transactions  
19 necessary to complete the capacity release were completed. Staff does not contest  
20 the amortization of the credit beginning November 1, 2009. However, Staff does  
21 contest using November 1, 2009 as the date for including the credit as an offset to  
22 regulatory assets. It is more appropriate to recognize the credit to regulatory assets  
23 on the day of receipt of the payment (October 24, 2008).
