Re: VoIP & 9-1-1

On June 3, 2005, the Federal Communications Commission released a First Report and Order and Notice of Proposed Rulemaking in the IP-Enabled Services Docket outlining E911 Requirements for interconnected IP-Enabled Service Providers (WC Docket No. 05-196). In support of this order, Verizon Wholesale Markets announces publication of a guide to help interconnected VoIP carriers evaluate and implement their 9-1-1 plans in areas where Verizon is the 9-1-1 ALI host. At the attached link below, you will find the VoIP 911 guide published this month. At the same link, there are other guides available to carriers to help them implement 9-1-1 solutions for their wireless or wire line 9-1-1 callers.

Please review the VoIP 9-1-1 Guide and contact your Verizon account manager if you have any additional questions on this matter.
