Dear Commissioners,

I am concerned about climate change and the pollution caused by burning fossil fuels. Please demand that PSE close all Colstrip plants by 2025 and replace them with 100% renewable energy. Furthermore, as a customer of PSE i find it ridiculous that the energy that is produced by the people of Washington is used to generate profits for an Australian corporation. PSE should belong to the people. Please do whatever it takes to take back our public infastructure. We need public ownership of the means of production.

Thanks for your service and time

-Dominic.
