**Re: Docket UT-061789 – *In the Matter of the Request of Verizon Northwest Inc. For Assignment of Telephone Number Resources***

Dear Ms. Beaton:

As the Commission will recall, Verizon Northwest, Inc. (“Verizon”) requested a ten thousand block (425-302-NXX) on behalf of T-Mobile via the Commission’s established safety valve procedures. T-Mobile requested these numbers for internal business operations for a corporate facility located in Bothell, Washington.

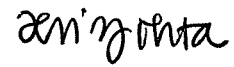

At the time of the Commission’s approval of this specific safety valve request, T-Mobile agreed to provide updated utilization information for the relevant ten thousand block in conjunction with our biannual filing of the Federal Communications Commission (“FCC”) Number Resource Utilization and Forecasting Report (“NRUF”). T-Mobile provided such information on August 1, 2007 and February 1, 2008. T-Mobile has utilized, and continues to use the vast majority of numbers in the ten thousand block consistent with our communicated plan to provide telecommunication services at our T-Mobile facility in Bothell.

Since T-Mobile continues to have a high utilization rate for this block, and the Commission has access to the utilization information via the NRUF (from which T-Mobile’s report is derived), T-Mobile intends to cease reporting on this information. We are available to work with the Commission should there be any questions regarding T-Mobile’s utilization of this block in the future.

Ms. Rebecca Beaton
