COMMISSION

The undersigned represents the Railroad Company in the GCPF application described as (enter a brief description):

550 ft. fencing project for trespass abatement. Chain link fencing to be erected between Skykomish School and the BNSF Railway right-of-way along Railroad Ave. Surveys locating the boundary have been completed and the application indicates all construction will be on Town of Skykomish property.

We have reviewed the application and are satisfied the conditions are the same as described by the applicant in this matter. We agree to allow construction, modification or demolition on a railroad right-of-way as described in the application.

See notes below.

Notes: BNSF supports this application for safety improvements. The final design and location of the fencing will need to be approved by BNSF prior to its installation. The City will also need to obtain a permit from BNSF with current indemnity language and insurance limits and with a 30-day cancellation clause, if the fencing would be on BNSF's Right-of-way.
