Subject: Docket # TR-100131, At-grade Crossing Modifications

Good afternoon, Kathy. As a follow up to our earlier conversation, I wanted to provide you with a brief status regarding DuPont's response to the referenced petition to the Washington Utilities and Transportation Commission. Under the petition, WSDOT is seeking approval to modify the existing at-grade crossing railroad crossing at Barksdale Avenue to allow passenger trains to utilize the rail. The City is requesting additional time in which to address the notice of petition as a respondent.

As we had discussed, City staff has been working to coordinate with WSDOT project representatives for a project overview presentation to our City Council, which has been set to occur at this evening's Council Meeting. I anticipate that I will be better able to respond to the City's position for 'support'/or 'non-support' on the project petition following tonight's presentation and discussion. I plan to provide you with an update by Friday, and will work to prepare a formal response as soon as possible.

Please feel free to contact me if you have any further questions. Have a great evening.

Peter L. Zahn
