Re: UT-190861 – Northwest Fiber, LLC – Registration and Competitive Classification

Dear Mr. Johnson,

Northwest Fiber, LLC understands that the Commission Staff’s standard practice is to complete review of applications for the registration and competitive classification of telecommunications companies within 30 days of filing. On October 16, 2019, Northwest Fiber, LLC submitted a filing in this docket seeking registration as a competitively classified provider of interexchange (long-distance) services. Although the standard period for review is set to end on November 15, 2019, Northwest Fiber, LLC has no objection to Staff taking an additional 30 days (or until December 15, 2019) to complete its review of the filing in this docket. It would be acceptable to Northwest Fiber, LLC for the registration and competitive classification sought here to have an effective date as of December 15, 2019.

Please contact the undersigned if you have any questions about this filing.

Sincerely,

Davis Wright Tremaine LLP

Alan J. Galloway
