QWEST DATA REQUEST NO. 32:

Please describe in detail the assumptions Staff made in calculating its estimate of \$150,000 as the cost Qwest would incur to extend service to Ike Nelson, including specifically assumptions about available unused pairs in Qwest's existing cables, locations of such cables, cost of placement, type of placement, whether reinforcement would be required and if so what facilities would be placed, distances to the Qwest Omak central office, type of facilities used, whether single party or multiparty service was assumed, how many lines were assumed for each customer, how many customers Qwest would be extending for, where they were located and whether Qwest must, in light of this Commission ordered extension, prepare to extend further from the new end of these same facilities in response to another Staff motion in the future.

RESPONSE:

Please see Staff's response to Qwest's Data Request Nos. and 22.
