**IMPORTANT MAP INFORMATION**

The map is not a guarantee of coverage and contains areas with no service.

This map shows approximately where rates apply based on our internal data. Wireless service is subject to network and transmission limitations, including cell site unavailability, particularly near boundaries and in remote areas. Customer equipment, weather, topography and other environmental considerations associated with radio technology also affect service and service may vary significantly within buildings. Some information on service outside the Verizon Wireless proprietary network, although depicted as Local Digital Choice, is based on information from other carriers or publicly available information, and we can not vouch for its accuracy. With "all-digital" devices you can only make and receive calls when digital service is available on the Digital Choice All-Digital Network and when roaming. When digital service is not available your device will not operate or be able to make 911 calls. Check the roam indicator on your phone to determine actual areas where service rates apply. Mobile to mobile and other features are not available throughout Digital Choice Rate Area. See Local Mobile to Mobile brochure for details.
