Dear Washington Utilities and Transportation Commission,

People have yet to receive another stimulus check, how are people expected to start paying for utilities when families are already struggling to find work and pay for other necessities! Washington state should extend the moratorium on utility shut offs because our citizens have not been supported enough financially, during this entire pandemic. Shutting utilities off during the winter is inhumane. Please keep Washingtonians connected to power. This matters because we're seeing our families, friends and neighbors struggle through this difficult time.

I am writing to ask the Utilities and Transportation Commission extend the moratorium on utility shut offs until at least September.

It is now clear: the moratorium saves lives. A recent study by the National Bureau of Economic Research showed that the coronavirus infection rates last year were 4.4% lower in communities that banned electricity and water service disconnections during the pandemic, while death rates from the disease were 7.4% lower.

Almost a year into the COVID crisis, it is clearer than ever that the effects of the pandemic are not going away anytime soon. We need to act on people's needs instead of those of profitable utility companies. Right now, up to 2.2 million people in Washington -- almost one-third of the state -- could be struggling to pay for food, according to recent reports. You have the power to ensure that we don't compound their suffering by turning off their electricity, too.

Washington can be a state where everyone -- no matter their race, income, or where they live -- has access to electricity. This is a state where people's health and well being, not corporate profits, can drive policymakers' decisions. Utilities are more essential than ever to keep our communities healthy and safe. Together, we must make sure that Washingtonians can count on essential utilities throughout the pandemic and beyond.

Please, keep the lights on.

Sincerely,

Brenda Villa
