WUTC Data Request 105

WUTC Data Request 105

REQUESTED BY: Jason Ball

RE: The following data requests relate to the Idaho Power Asset Exchange as discussed by Company witness Richard A. Vail.

Regarding the direct testimony of Richard A. Vail, Exhibit No. RAV-1T, page 8, lines 10-13, please explain in detail how the Idaho Power Asset Exchange will “enable the Company to more efficiently operate its transmission system.”

Response to WUTC Data Request 105

Following the exchange, PacifiCorp has ownership on the Jim Bridger to Goshen line that facilitates service to the Goshen area load. PacifiCorp did not have this ability before the exchange.

In addition, the conversion of PacifiCorp’s legacy contract transmission service to Idaho Power tariff service in the Hurricane and La Grande areas provides new flexibility, including the benefits of redirecting service, firm service, and all other benefits of tariff service.

PREPARER: Brian Fritz / Patrick Cannon
