---

Safety and utility of SMART Meters need more study before appropriate policy can be written.

Please see attached letter from the Citizen League Encouraging Awareness of Radiation (CLEAR) on Whidbey Island. This citizen group has done an outstanding job of searching scientific data bases for pertinent information on the health, safety and other concerns regarding proposed SMART Meter usage. Please read and take into considerations the concerns that CLEAR has identified.

As a former public health nurse it is clear to me that the policy created now will affect our health today and that of future generations. As a primary care provider for the past 17 years, I know prevention is the best medicine. At a minimum, there is increasing concern regarding cumulative exposure of EMF on personal health. It is imperative that thoughtful, studied, researched policy be created regarding SMART Meters. .

Sincerely,  
Toni Marthaller
