RESPONSE:

- a. As indicated in response to PC_DR_049, part b, there was ADFIT related to the repairs adjustment of (\$12,601,733) included in the adjusted September 30, 2014 electric results of operations. There was zero ADFIT for bonus depreciation on 2014 property, since the IRS did not approve bonus until December 2014.
- b. That information was not provided by the repairs adjustment consultant.
- c. The Company is in the process of finalizing the 2014 federal tax return, in addition to finalizing the 2014 state tax returns and preparing all of the tax data to record for the closing of September's books. This information will not be available until that process is complete, which will be mid-October.
- d. Please see the Company's response to PC DR 100.
- e. There was ADFIT related to the bonus depreciation of (\$17,248,756) on 2014 electric plant for Washington.
