SCHEDULE NO. 11

READY TO SERVE CHARGE

AVAILABLE

Within the limits of all water service areas and at utility's option and capability to maintain Department of Health standards of quantity and quality.

APPLICABLE

Applicable to domestic residential customers, where service connections exist, where meters have not yet been installed and where mains of adequate capacity and service lines have been installed and are maintained by the utility in or on streets, easements or roadway within the service area described in this tariff.

CONDITIONS

- 1. The Ready To Serve Charge will be applied for the availability of water service and not on the basis of water consumption. This charge will be the monthly minimum for this class of service.
- 2. The Ready To Serve Charge may be discontinued upon receiving written request from the customer or for non-payment of the Ready To Serve charge. Termination of the charge will allow the utility to remove the service line and/or connection. This disconnection or removal will allow the company to make that available service capacity to supply other connections on the water system or in the water system service area. After a service line and/or connection has been removed for discontinued service, future service to the property will require a new application for service, payment of service connection charges and will be subject to the availability of service capacity at such time as the future service application is made.

MONTHLY RATES

Each connection or customer
