RE: DOCKET NO. TS-050443
Report per RCW 81.84.010 (2)

Dear Ms. Washburn:

Feet Wet Partners, LLC. (FWP) submits the following report in compliance with the above code section;

1. At this stage no environmental impact review is anticipated as all facilities intended for use by FWP are already permitted for water vessel use.
2. Parking issues have been minimized through negotiations with Island Transit for feeder bus routes and utilization of park and ride lots.
3. Island county Commissioners are considering a proposal to utilize county owned land on Camano Island for a POF facility.
4. FWP has commitments from the City of Oak Harbor and the Port of Coupeville for docking facilities. The issue has been raised with WSF and discussions are expected within the next month or two.
5. Island County RTPO and Island County have before them proposals for providing assistance through grant programs.
6. Vessel design is being refined as FWP receives more input from potential high volume users.
7. FWP is closely monitoring the situation with the legislature in light of recent legislation which seems to restrict access of the public to POF's.

Progress continues in the expectation that FWP will initiate service despite the twenty month restriction that the legislature recently placed on POF applicants.
