Re: Docket No. UE-171091 - Avista Utilities 2018-2019 Biennial Conservation Report (BCR)  
Replacement Pages

Dear Mr. Johnson,

On May 29, 2020, in compliance with RCW 19.285 and WAC 480-109-120 (3), Avista Corporation, dba Avista Utilities (“Avista” or “the Company”), respectfully submitted its 2019 Annual Conservation Report (ACR). Included as Appendix A to the filing, and in compliance with RCW 19.285 and WAC 480-109-120 (4), was the Company’s 2018-2019 Biennial Conservation Report (BCR).

Since the filing of the BCR, it has been brought to the Company’s attention that the 5% decoupling commitment of 4,489 MWh was inadvertently unaccounted for in Avista’s calculation of its excess savings for the 2018-2019 biennium. The Company has since corrected this error, bringing the 2018-2019 excess savings down to 4,841 MWh rather than the 9,330 MWh originally reported. This modification also changes the percentage by which the Company exceeded its total local biennium target down to 106% rather than the 112% initially calculated, and provides that Avista has 69,915 MWh of excess savings available to apply to a potential 2020-2021 shortfall as a result of prior two biennial savings achievements (as opposed to the 74,404 MWh of excess savings previously provided). As such, the Company hereby submits replacements for pages 3 and 4 of its 2018-2019 Biennial Conservation Report. These replacement pages correct the calculation

errors described above, and update the corresponding Tables contained within the BCR accordingly.

If you have any questions regarding this information, please contact Anna Scarlett, Director of Energy Efficiency, at 509-495-2557 or myself at (509) 495-2782.

Sincerely,

*/s/ Shawn Bonfield*
