

**BEFORE THE WASHINGTON
 UTILITIES AND TRANSPORTATION COMMISSION
 DOCKET NO. UT-100820
 CENTURYLINK RESPONSES TO
 INTEGRA'S FIRST SET OF INFORMATION REQUESTS
 NOS. 1 THROUGH 156.**

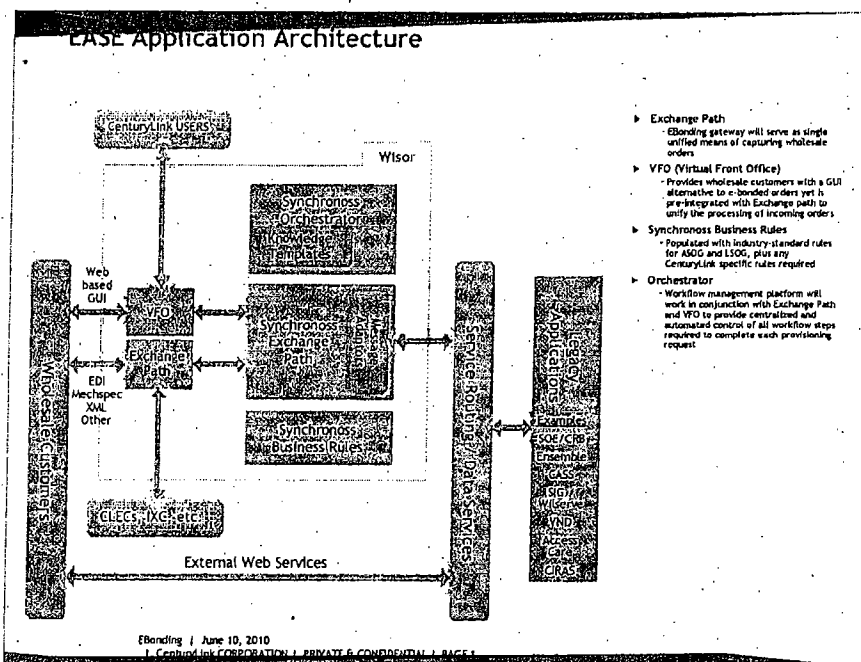

17. Identify all back-office systems/platforms CenturyLink uses to support CLECs. A complete response will include a listing and description of each system and any documentation in the company's possession regarding those systems.

CenturyLink Objection:

CenturyLink objects to this request because it is vague, ambiguous, overly broad, and imprecise by requesting "any" documentation related to back-office systems without any specificity to establish the relevancy of that documentation to the scope of the inquiry in this docket.

CenturyLink Response:

Subject to and without waiving its objection, the diagram below depicts CenturyLink OSS architecture, back-office systems and interfaces. Please also see Confidential Attachment Integra-22c. In addition, please refer to www.centurylink.com/wholesale for documentation of back-office systems/platforms CenturyLink uses to support CLECs.
