

**BEFORE THE WASHINGTON
UTILITIES AND TRANSPORTATION COMMISSION
DOCKET NO. UT-100820
CENTURYLINK RESPONSES TO
INTEGRA'S FIRST SET OF INFORMATION REQUESTS
NOS. 1 THROUGH 156**

78. Refer to the Direct Testimony of Michael Hunsucker filed in Oregon Docket No. UM1484 on June 22, 2010 at pages 4-10. Answer the following:
- a. Provide an organizational chart for CenturyLink's Wholesale Operations Organization, identifying the names and titles of persons in that group.
 - b. Provide a username and password that allows viewing of CenturyLink's on-line wholesale website and interfaces. A "test" profile is acceptable so long as access allows for viewing all functionalities of the on-line wholesale website (with the exception of third-party proprietary information).
 - c. Provide all documentation describing EASE, WebRRS, and CSPRS.
 - d. Provide copies of the service performance reports accessible via CSPRS. For purposes of this response, redacting the names of CLECs to protect their identities is acceptable.

CenturyLink Response:

- a. Please see Attachment Integra-78a - Wholesale Functional Org Chart.
- b. A login and password is not required to access www.centurylink.com. To access use:

<http://www.centurylink.com/Pages/Identification/wholesaleIdentification.jsp>
- c. Please see Attachment Integra-78c
- d. Please see Confidential Attachment Integra-78d

Sponsor: Diane Roth, Director Contract Management; Valerie Wright, Manager Product Management - Wholesale

CLEC Management & Service Reporting

Headcount: 50
 Contractors: 1

- Manage contract (both interconnection & commercial agreements) negotiations with CLECs and other Wholesale carriers
- Proactively work with Wholesale Product Management to incorporate product plans in contracts
- Ensure contract language compliance with company policies
- Provide support for arbitrations and complaint proceedings

- Perform account management functions with CLEC customers including implementing interconnection agreements, ensuring compliance and resolving customer issues, complaints, etc.
- Proactive sales of products in territory (i.e., special access, HIS, wholesale VOIP) to CLEC customers
- Support wholesale revenue recovery efforts through audits in the areas of collocation, contract rates, facilities, 911 ports, etc.
- Support efforts in the area of expense reductions such as direct end office trunking and bi-directional trunking
- Primary wholesale customer interface

- Manage reciprocal compensation and access expense spend with other carriers
- Manage FCC and state interconnection compliance including PIU, PLU, VOIP, etc.
- Manage state mandated performance management plan and performance incentive plan in Nevada
- Manage IXC, CLEC and CMRS service reporting both internally and externally to customers (i.e., special access & CLEC services)
- Program manage wholesale revenue recovery projects (working with various internal groups, i.e. Wholesale, Finance)
- Wholesale use and support of Agilent SS7 call records

- Perform account management functions with CLEC customers including implementing interconnection agreements, ensuring compliance and resolving customer issues, complaints, etc.
- Proactive sales of product in territory (i.e. special access, HIS, wholesale VOIP) to CLEC customers
- Support wholesale revenue recovery efforts through audits in the areas of collocation, contract rates, facilities, 911 ports, etc.
- Support efforts in the area of expense reductions such as direct end office trunking and bi-directional trunking
- Primary wholesale customer interface

- Provide support for arbitration, mediation or other Commission managed actions including written and oral testimony
- Work with various internal groups on providing support for settling outstanding dispute matters.
- Act as the liaison for the CLEC management and service reporting group with the regulatory policy group on identification and advocacy of key regulatory initiatives
- Identify cost savings or revenue opportunities for intercarrier compensation matters and other issues such as VVXX, etc.
- Serve as Wholesale witness in various regulatory proceedings

- Provide support for CTL CLEC operations in various states
- Lead on interconnection agreement (ICA) contract language
- Serve as Wholesale witness in various regulatory proceedings
- Provide support on development on CLEC policies

Wholesale Staff Operations

Headcount: 2
Contractors: 0

Staff Operations Manager
Overland Park, KS

Sales Compensation Analyst II
Overland Park, KS

- Manage the activities of sales operations function: design and execute incentive compensation plans (9 plans) to 30+ sales employees in Public Access / Inmate / Carrier sales teams
- Financial modeling, forecasting, analysis and various revenue reporting
- Act as intermediary between President and other organizations: monthly operation reviews, Wholesale scorecard, Glen Post weekly reports, presentations, Customer Satisfaction surveys, All Hands events, draft communications, internal policies, etc.
- Serve as liaison with key internal or external customers or vendors to resolve operational issues
- Mobilizer Business Development

Embarq Performance Measurement Plan

I. EXECUTIVE SUMMARY

Performance Measures Development Process

The Telecommunications Act of 1996 and the FCC's implementing rules require ILECs to provide CLECs with nondiscriminatory access to OSS. In the August 1996 Local Competition First Report and Order, the FCC commented, generally, that ILECs must provide CLECs with access to the pre-ordering, ordering, provisioning, billing, repair, and maintenance OSS sub-functions pursuant to the Act, such that CLECs are able to perform such OSS sub-functions in "substantially the same time and manner" as the ILECs can for themselves.¹ In August of 1997, the FCC's *Ameritech Opinion* analyzed the nondiscriminatory access requirements of §251(c) to a Bell Operating Company's (BOC's) §271 application, and clarified that for those OSS subfunctions with retail analogs, a BOC "must provide access to competing carriers that is equal to the level of access that the BOC provides to itself, its customers or its affiliates, in terms of quality, accuracy and timeliness."² The FCC further clarified in the *Ameritech Opinion* that for those OSS functions with no retail analog, a BOC must offer access sufficient to allow an efficient competitor "a meaningful opportunity to compete."³

In mid -1997, the Public Utilities Commission of Nevada (Nevada PUC or Nevada Commission) initiated Docket 97-9022 to address monitoring the performance of Operations Support Systems (OSS). The stated goal of the Commission's proceeding is to investigate procedures and methods necessary to determine whether interconnection, unbundled access and resale services provided by incumbent local exchange carriers are at least equal in quality to that provided by the local exchange carrier to itself or to any subsidiary, affiliate, or any other party.

The scope of the proceeding included measures, reporting, comparative analogs, benchmarks, statistical tests, audits and incentives. The Nevada Commission initiated a series of workshops to address many of these issues. The participating parties have worked in a collaborative fashion to resolve as many issues as possible. Sprint filed a Performance Measurement Plan revision in 2002 which was approved by order of the Commission in Docket 02-1039. Another revision of the plan was approved by order of the Commission in 2003 in Docket 03-1041. This report is not intended to address statistical tests and incentives.

¹ See, Implementation of the Local Competition Provisions in the Telecommunications Act of 1996, CC Docket No. 96-98, First Report and Order, 11 FCC Rcd 15499, 15763-64 [¶518] (1996) ("Local Competition First Report and Order"), aff'd in part and vacated in part sub nom. Competitive Telecommunications Ass'n v. FCC, 117 F.3d 1068 (8th Cir. 1997) and Iowa Utilities Bd. v. FCC, 120 F.3d 753 (8th Cir. 1997), modified on reh'g, No. 96-3321 (Oct. 14, 1997) (Rehearing Order), petition for cert. granted, 118 S. Ct. 879 (1998).

² See, In the Matter of Application of Ameritech Michigan Pursuant to Section 271 of the Communications Act of 1934, as amended, To Provide In-Region, InterLATA Services In Michigan, Memorandum Opinion and Order, 12 FCC Rcd 20543, 20618-19 [¶139] (1997) (Ameritech Michigan Order), writ of mandamus issued sub nom. Iowa Utils. Bd. v. FCC, No. 96-3321 (8th Cir. Jan. 22, 1998). ("Ameritech Opinion"); see also, In the Matter of Application of Bellsouth Corporation, et al., for Provision of In-Region, InterLATA services in Louisiana ("BellSouth (Louisiana II) Opinion") CC Docket No. 98-121, FCC 98-271 (10-13-98), paragraph 87 (citing, Ameritech Opinion at 12 FCC Rcd 20618-19). See also, Ameritech Opinion at ¶131, wherein the FCC makes the following statement regarding application of the §251(c) requirements to a BOC's §271 application: "Because the duty to provide access to network elements under section 251(c)(3) and the duty to provide resale services under section 251(c)(4) include the duty to provide nondiscriminatory access to OSS functions, an

Embarq Performance Measurement Plan

examination of a BOC's OSS performance is necessary to evaluate compliance with section 271(c)(2)(B)(ii) and (xiv).³ See, Ameritech Opinion at 12 FCC Rcd at 20619 [¶141]; See also, BellSouth (Louisiana II) Opinion at ¶87 (citing Ameritech Opinion at 12 FCC Rcd at 20619).

Notes:

These performance measures are not intended to create, modify, or otherwise affect parties' rights and obligations. The existence of any particular performance measure, or the language describing that measure, is not evidence that the CLECs are entitled to any particular manner of access, that these measures relate solely to access to OSS, nor is it evidence that the ILEC's obligations to such access are defined elsewhere, including the relevant laws, FCC, and state decisions/regulations, tariffs, and interconnection agreements

Major Categories

Measurements developed to help assess the provision of non-discriminatory access to OSS and other services, elements or functions were combined into the following broad categories:

- **Pre-Ordering**

Pre-ordering activities relate to the exchange of information between the ILEC and the CLEC regarding current or proposed customer products and services, or any other information required to initiate ordering of service. Pre-ordering encompasses the critical information needed to submit a provisioning order from the CLEC to the ILEC. The pre-order measurement reports the timeliness with which pre-order inquiries are returned to CLECs by the ILEC. Pre-ordering query types include:

- Address Verification/Dispatch Required
- Request for Telephone Number
- Request for Customer Service Record
- Service Appointment Scheduling (due date)
- Rejected/Failed Queries
- Facility Availability
- Loop Pre-Qualification

- **Ordering**

Ordering activities include the exchange of information between the ILEC and the CLEC regarding requests for service. Ordering includes: (1) the submittal of the service request from the CLEC, (2) rejection of any service request with errors and (3) confirmation that a valid service request has been received and a due date for the request assigned. Ordering performance measurements report on the timeliness with which these various activities are completed by the ILEC. Also captured within this category is reporting on the number of CLEC service requests that automatically generate a service order in the ILECs' service order creation system.

- **Provisioning**

Embarq Performance Measurement Plan

Provisioning is the set of activities required to install, change or disconnect a customer's service. It includes the functions to establish or condition physical facilities as well as the completion of any required software translations to define the feature functionality of the service. Provisioning also involves communication between the CLEC and the ILEC on the status of a service order, including any delay in meeting the commitment date and the time at which actual completion of service installation has occurred. Measurements in this category evaluate the quality of service installations; the efficiency of the installation process and the timeliness of notifications to the CLEC that installation is completed or has been delayed.

- **Maintenance**

Maintenance involves the repair and restoral of customer service. Maintenance functions include the exchange of information between the ILEC and CLEC related to service repair requests, the processing of trouble ticket requests by the ILEC, actual service restoral and tracking of maintenance history. Maintenance measures track the timeliness with which trouble requests are handled by the ILEC and the effectiveness and quality of the service restoral process.

- **Network Performance**

Network performance involves the level at which the ILEC provides services and facilitates call processing within its network. The ILEC also has the responsibility to complete network upgrades efficiently. Network performance is evaluated on the quality of interconnection and the timeliness of network upgrades (code openings) the ILEC completes on behalf of the CLEC.

- **Billing**

Billing involves the exchange of information necessary for CLECs to bill their customers, to process the end user's claims and adjustments, to verify the ILEC's bill for services provided to the CLEC and to allow CLECs to bill for access. Billing measures have been designed to gauge the quality, timeliness and overall effectiveness of the ILEC billing processes associated with CLEC customers.

- **Database Updates**

Database updates for directory assistance/listings and E911 include the processes by which these systems are updated with customer information that has changed due to the service provisioning activity. Measurements in this category are designed to evaluate the timeliness and accuracy with which changes to customer information, as submitted to these databases, are completed by the ILEC.

- **Collocation**

ILECs are required to provide to CLECs available space as required by law to allow the

Embarq Performance Measurement Plan

installation of CLEC equipment. Performance measures in this category assess the timeliness with which the ILEC handles the CLEC's request for collocation as well as how timely the collocation arrangement is provided.

- **Interfaces**

ILECs provide the CLECs with choices for access to OSS pre-ordering, ordering, maintenance and repair systems. Availability of the interfaces is fundamental to the CLEC being able to effectively do business with the ILEC. Additionally, in many instances, CLEC personnel must work with the service personnel of the ILEC. Measurements in this category assess the availability to the CLECs of systems and personnel at the ILEC work centers.

ILEC's

By implementing these performance measurements, ILEC's:

- does not make any admission regarding the propriety or reasonableness of establishing performance penalties;
- does not admit that an apparent less-than-parity condition reflects discriminatory treatment without further factual analysis.

CLECs

- By implementing these performance measurements, CLECs do not agree with, endorse, or otherwise concur in the terms of ILECs reservation of rights.

Embarq Performance Measurement Plan

All Manual:			
Facility Availability	Request for Facility Availability		TBD
Loop Pre-Qualification	Request for Loop Pre-Qualification		TBD
<i>Business Rules</i>	<ul style="list-style-type: none"> • Elapsed time is measured in seconds for electronic pre-order requests. • Results for CLECs with 5 or fewer transactions will be compared with a benchmark of twice the applicable electronic submeasure to determine compliance. • Elapsed time for fully electronic submeasures will be tracked during scheduled interface availability hours. • Exclude transactions that occur during OSS outages. 		
<i>Notes</i>	<ul style="list-style-type: none"> • Embarq defines Simple CSR queries as a query on an account that has 4 or fewer lines. • Implementation of systems to comply with Federal National Portability requirements will prevent the capability to query by NPA/NNX in 2002 to obtain Service Availability information as an independent query. Service Availability information is available in Address Verification/Dispatch Required and Customer Service Record queries. • Submeasure Facility Availability provides switch verification information and Loop Pre-Qualification provides outside plant loop facility information. • The benchmark for Service Appointment Scheduling is To Be Determined (TBD) because Embarq implemented a new process for this disaggregation in 2002. After 12 consecutive months of historical data is collected, Embarq will re-evaluate the benchmark. • There is insufficient historical data to develop a valid benchmark for To Be Determined (TBD) disaggregation levels.

Measure 5

Title: Percentage of Orders Jeopardized

Area	Requirement Description																																																																																												
Description	Percentage of total orders processed for which the ILEC notifies the CLEC that the work will not be completed by the due date committed on the FOC.																																																																																												
Method of Calculation	(Number of Orders Jeopardized) / (Number of Orders Completed) x 100																																																																																												
Report Period	Monthly																																																																																												
Report Structure	Individual CLEC, CLECs in the aggregate, ILEC and ILEC Affiliates																																																																																												
Reported By	By service group type																																																																																												
Geographic Level	Statewide																																																																																												
Measurable Standards	Embarq is required to provide a retail analog for this measurement.

Measure 6

Title: Average Jeopardy Notice Interval

Area	Requirement Description																																																																				
Description	Measures the remaining time between the pre-existing committed order completion date and time (communicated via the FOC) and the date and time the ILEC issues a notice to the CLEC indicating an order is in jeopardy of missing the due date (or the due date/time has been missed).																																																																				
Method of Calculation	<p>Assignment: Jeopardies identified during assignment</p> <p>Sum((Date and Time of Committed Due Date for the Order) - (Date and Time of Jeopardy Notice) / (Number of Orders Jeopardized))</p> <p>Installation: Jeopardies identified during installation prior to due time</p> <p>Sum ((Date and Time of Committed Due Date for the Order) - (Date and Time of Jeopardy Notice) / (Number of Installation Jeopardy Notices)</p> <p>Notification of Missed Commitments: Sum(Due Date and Time of Missed Commit Notice) - (Due Date and Time of Order) / (Number of Missed Commit Notices)</p>																																																																				
Report Period	Monthly																																																																				
Report Structure	Individual CLECs, CLECs in the aggregate, and ILEC Affiliates																																																																				
Reported By	<ul style="list-style-type: none"> • By service group type • By jeopardy type 																																																																				
Geographic Level	Statewide

Title: Percent of Due Dates Missed Due to Lack of Facilities

Area	Requirement Description																																																																																																
Description	Measures the percent of new, move and change orders missed due to lack of facilities. Note: Results also included in Measure "Percent Missed Due Dates"																																																																																																
Method of Calculation	$(((\text{Total New, Move and Change Orders Missed Due Dates Due to Lack of Facilities}) / (\text{Total Number of New, Move and Change Orders}))) \times 100$																																																																																																
Report Period	Monthly																																																																																																
Report Structure	Individual CLEC, CLECs in the aggregate, by ILEC, and ILEC Affiliates																																																																																																
Reported By	By service group type																																																																																																
Geographic Level	Statewide																																																																																																
Measurable Standards	Embarq is required to provide a retail analog for this measurement.

Measure 18

Title: Average Completion Notice Interval

Area	Requirement Description			
Description	Measures the average time per order to issue notification to CLEC of a completed order.			
Method of Calculation	<p>All Electronic: $\text{Sum}(\text{Date and Time of Electronic Completion Notification to CLEC}) - (\text{Date and Time of Work Completion}) / (\text{Number of Orders Completed Electronically})$</p> <p>Electronic/Manual Mix: $[(\text{Number of Manual Orders where } ((\text{Date and Time of Electronic Completion Notification to CLEC}) - (\text{Date and Time of Work Completion}) \leq 24) / (\text{Number of Orders Completed That Required Manual Intervention}))] \times 100$</p>			
Report Period	Monthly			
Report Structure	Individual CLEC, CLECs in the aggregate, and by ILEC Affiliates			
Reported By	Electronic and Electronic/Manual Mix Interface			
Geographic Level	Statewide			
Measurable Standards	Disaggregation Level	CLEC	Retail Comparison Standard	
			Parity	Benchmark
	All Electronic	Completion Notice		TBD
	Electronic/Manual Mix	Completion Notice		TBD
Business Rules	<ul style="list-style-type: none"> • 24-hour clock is used to measure interval for electronic/manual process. • For fully electronic completions that occur after 11pm (Eastern), the interval will start at 8am (Eastern) the next business day. • Excludes weekends and ILEC published holidays • Excludes Loop Pre-Qualification queries 			
Notes	<ul style="list-style-type: none"> • Embarq will track fall out rate.

Measure 24

Title: Percent Blocking on Common Trunks

<i>Area</i>	<i>Requirement Description</i>		
<i>Description</i>	Measures the total percentage of blockage across all common and shared transport trunk groups exceeding 1% blockage. Note: Includes list of trunks exceeding 1% benchmark		
<i>Method of Calculation</i>	$\left[\frac{\text{Total blocked calls across all common and shared transport trunk groups}}{\text{Total call attempts count across all common and shared transport trunk groups}} \right] \times 100$		
<i>Report Period</i>	Monthly		
<i>Report Structure</i>	Reported by common/shared transport trunk group		
<i>Reported By</i>	State		
<i>Geographic Level</i>	Statewide		
<i>Measurable Standards</i>			
	Disaggregation Level	CLEC	Retail Comparison Standard Parity Benchmark
	State	Common Trunk Group	TBD
<i>Business Rules</i>	<ul style="list-style-type: none"> • Exclude 911 trunks except where ILEC has augmentation control. • Excludes the maintenance window (12am local time to 6am local time. • Internal traffic data collection procedures exclude force majeure (Acts of God, Natural Disasters, etc.) • Measured by: <ul style="list-style-type: none"> - Total trunk groups - Percent Blocking 		
<i>Notes</i>	<ul style="list-style-type: none"> • Common trunk groups provide service to all customers, therefore, there is one result for both CLEC and ILEC. 		

Embarq Performance Measurement Plan

Network Performance

Measure 25

Title: Percent Blocking on Interconnection Trunks

Area	Requirement Description
Description	Measures the total percent of blockage on final dedicated interconnection trunk groups exceeding 1% blockage.
Method of Calculation	$[(\text{Total blocked calls across all final dedicated interconnection trunk groups per CLEC}) / (\text{Total call attempts count across all final dedicated interconnection trunk groups per CLEC})] \times 100$
Report Period	Monthly
Report Structure	Individual CLEC, CLECs in the aggregate, and ILEC Affiliates
Reported By	State
Geographic Level	Statewide
Measurable Standards	Disaggregation Level
	CLEC
	Retail Comparison Standard
	Parity
	Benchmark
	State
	Interconnection Trunks
	No more than 1% blockage
Business Rules	<ul style="list-style-type: none"> • Only measured on trunks where ILEC has outgoing traffic to CLECs and where ILEC controls trunk capacity. • Threshold exception trunk detail. • Internal traffic data collection procedures exclude force majeure (Acts of God, Natural Disasters, etc.). • Excludes the maintenance window (12am local time to 6am local time). • Applies to those trunks where the ILEC has augmentation control • Does not apply when trunks are provisioned as two-way trunks.
Notes	<ul style="list-style-type: none"> • Measured by: <ul style="list-style-type: none"> - Total trunk groups - Threshold exceptions - ILEC end office to CLEC end office - ILEC tandem to CLEC end office

Measure 26

Title: NXX Loaded by LERG Effective Date

Area	Requirement Description												
Description	Measures the number of NXXs loaded and tested by the LERG effective date.												
Method of Calculation	$\left[\frac{\text{((Number of NXXs loaded and tested by LERG effective date))}}{\text{(Number of NXXs scheduled to be loaded and tested by LERG effective date)}} \right] \times 100$												
Report Period	Monthly												
Report Structure	Individual CLEC, CLECs in the aggregate, by ILEC (if analog applies) and by ILEC Affiliates												
Reported By	Reported for all NXX codes scheduled to be loaded in reporting period												
Geographic Level	Statewide												
Measurable Standards	Embarq is required to provide a retail analog for this measurement.												
	<table border="1"> <thead> <tr> <th>Disaggregation Level</th> <th>CLEC</th> <th colspan="2">Retail Comparison Standard</th> </tr> <tr> <th></th> <th></th> <th>Parity</th> <th>Benchmark</th> </tr> </thead> <tbody> <tr> <td>CLLI</td> <td>CLEC NXXs loaded</td> <td>ILEC NXXs loaded</td> <td></td> </tr> </tbody> </table>	Disaggregation Level	CLEC	Retail Comparison Standard				Parity	Benchmark	CLLI	CLEC NXXs loaded	ILEC NXXs loaded	
	Disaggregation Level	CLEC	Retail Comparison Standard										
		Parity	Benchmark										
CLLI	CLEC NXXs loaded	ILEC NXXs loaded											
Business Rules	<ul style="list-style-type: none"> Excludes any NXX codes with requested loading interval of less than the industry standard (currently 45 calendar days). Excludes any NXX code facilities that cannot be completely tested because the CLEC has not provided an accurate test number or because CLEC facilities have not been installed. 												
Notes	<ul style="list-style-type: none"> NXX loading procedures include central office/tandem translations, verification of translations, call through testing, and AMA testing. 												

Embarq Performance Measurement Plan

Billing

Measure 28

Title: Usage Timeliness

Area	Requirement Description																				
Description	This measure captures the elapsed time between the recording of usage data generated either by CLEC retail customers or access usage associated with CLEC customers and the time when the data set, in a compliant format, is available for transmission to the CLEC.																				
Method of Calculation	$[(\text{Count of all messages available within 5 days}) / (\text{Count of all messages available for transmission in reporting period})] \times 100$																				
Report Period	Monthly																				
Report Structure	Individual CLECs, CLECs in the aggregate, by ILEC (if analog applies) and by ILEC Affiliates																				
Reported By	<ul style="list-style-type: none"> • Resale • UNE • Jointly provided switched access (associated with meet point billing) 																				
Geographic Level	Statewide																				
Measurable Standards	Embarq is required to provide a retail analog for certain levels of disaggregation for this measurement.																				
	<table border="1"> <thead> <tr> <th>Disaggregation Level</th> <th>CLEC</th> <th colspan="2">Retail Comparison Standard</th> </tr> <tr> <th></th> <th></th> <th>Parity</th> <th>Benchmark</th> </tr> </thead> <tbody> <tr> <td>Resale</td> <td>CLEC End user messages</td> <td>Embarq End user messages</td> <td></td> </tr> <tr> <td>UNE - Unbundled Network Element</td> <td>CLEC billing messages</td> <td>Embarq End user messages</td> <td></td> </tr> <tr> <td>Access (Associated with Meet Point Billing Only)</td> <td>CLEC access billing messages</td> <td></td> <td>TBD</td> </tr> </tbody> </table>	Disaggregation Level	CLEC	Retail Comparison Standard				Parity	Benchmark	Resale	CLEC End user messages	Embarq End user messages		UNE - Unbundled Network Element	CLEC billing messages	Embarq End user messages		Access (Associated with Meet Point Billing Only)	CLEC access billing messages		TBD
	Disaggregation Level	CLEC	Retail Comparison Standard																		
			Parity	Benchmark																	
Resale	CLEC End user messages	Embarq End user messages																			
UNE - Unbundled Network Element	CLEC billing messages	Embarq End user messages																			
Access (Associated with Meet Point Billing Only)	CLEC access billing messages		TBD																		
Business Rules	<ul style="list-style-type: none"> • The reporting period used will be calendar month (based upon the message process date). • Only Automated Message Accuracy (AMA) messages recorded by Embarq LTD are included. Alternate Billed Message and Connecting Company messages recorded by other companies are excluded. • Long duration calls are excluded because the message date does not accurately reflect the date on which the message was recorded. Long duration calls are defined as calls that remain connected through two successive midnights. 																				
Notes	<ul style="list-style-type: none"> • This measurement assumes a daily transmission of usage to the CLECs. If the CLECs do not request daily transmissions, the measurement still applies based upon transmission availability date, however the actual timeliness of the usage received by the CLEC will vary depending upon their requirements for frequency of transmissions (e.g. weekly). This measure only applies for CLECs who receive copies of their messages.

Notes	<ul style="list-style-type: none"> • None at this time. 			

Embarq Performance Measurement Plan

REPORTING PROCESS

Performance reports will be provided by the twentieth calendar day of the month succeeding the reporting period, unless otherwise approved by the Commission. The reporting period is the calendar month, unless otherwise noted. Positive reporting will be done for all measures, even those reported on an exception only basis.

Embarq will publish results for all CLECs who have ordered one or more CLEC products and have one or more CLEC access lines (e.g., Measure 19 denominator is 1 or more). If the CLEC announces they will discontinue service to all of their end users, performance reporting for the CLEC will cease on the last day of the month of the discontinuation month.

When reporting begins on a new measure or for a new CLEC, Embarq is only required to report results after a full calendar month of data is available. CLEC failure to provide an Operating Company Number (OCN) on orders will result in those orders being excluded from the CLEC Service Performance Measurements. Exclusions based on application of business rules apply to both the numerator and denominator of the Method of Calculation.

For those measures where results appear to be statistically less than parity or not meeting the benchmark level, Embarq will perform analysis of the data upon CLEC request. This analysis will detail the underlying causes contributing to the reported performance results. Within 90 days of the web-site publication of monthly results, a report recipient may request an analysis of a measurement that is less than parity or not meeting the benchmark. Embarq will provide the analysis within 45 days of the request.

Authorized users will have access to monthly reports through an interactive website. Each CLEC will have access to its own data, aggregate CLEC data, and Embarq Retail data. The Public Service Commission will have access to reports for all entities, including Embarq Affiliate data. Embarq Affiliate data will not be included in CLEC aggregate data.

In addition to the performance measure results themselves, upon request Embarq will provide data which comprise the results and which are readily available from the systems that provides the reportable data. Raw data will be archived for a period of 24 months to provide an adequate audit trail and will be retained with sufficient detail so that CLECs can reasonably reconcile the data captured by Embarq (for the CLEC) with its own internal data. Furthermore, data that relates to Embarq's own performance will be retained, at a consistent level of disaggregation comparable to that reported for the CLECs.

If revisions to the reports are required after the reporting due date, Embarq will repost results (if accurate data can be reconstructed) and publish a notification of the repost, along with the reason for reposting on the web site. Embarq will archive the repost notifications and make them available on the reporting web site for 12 calendar months and in archive an additional 12 months.

If there is noncompliance at the aggregate level in three consecutive months for a given level of disaggregation, Embarq shall provide to the Commission a report of root cause analysis on a

Embarq Performance Measurement Plan

monthly basis. Embarq's root-cause analysis shall include a plan for corrective action with key activities and critical completion dates for implementation.

Embarq will report affiliate results to the Commission, Bureau of Consumer Protection and CLECs under proprietary information provisions.

General Exclusions

Published results will not include the following:

- Queries, orders, or maintenance tickets initiated by Embarq for administrative purposes.
- Data impacted by customer-caused reasons.
- Data impacted by Embarq dependence on a third party (not including Embarq affiliates or agents within Embarq's control).
- Service results for products and services outside of Interconnection and Resale Agreements between Embarq and CLEC's

Embarq dependence on a third party

If Embarq dependence on a third party is not specifically noted in this document, Embarq will contact parties of record from Docket No. 000121B-TP (EMBARQ-NEVADA TRACK) to discuss implementation of the data exclusion. Embarq will request a meeting within 30 days and propose 5 potential meeting times to occur during business hours. If any party does not respond within 10 days, the meetings will be scheduled without their input.

Embarq will propose two meeting dates/times based on maximum availability of parties and request attendance at both. Any party who cannot make one or both meetings and wishes to request an alternate date/time must contact Embarq within 5 days. Contingent upon the willingness of parties to schedule meetings in a timely manner, Embarq will make every attempt to schedule meeting dates/times that are amenable to all parties.

At least 10 days prior to the first scheduled meeting, Embarq will distribute relevant documentation/information to parties.

During the first meeting, Embarq will describe the situation and answer questions from parties. If parties agree this constitutes a valid case of dependence on a third party, Embarq will implement this exclusion in the reporting system and communicate the intended implementation date.

If parties are not in agreement at the end of the first meeting, the second meeting will be utilized to resolve open issues. Additional meetings may be scheduled if parties are willing.

If parties cannot reach agreement, and Embarq wishes to pursue the exclusion, Embarq will initiate an expedited hearing process in accordance with the Commission's rules.

At least 30 days prior to implementation of a new exclusion, Embarq will publish a notification on the reporting website.

Attachment Integra-78c

Embarq Performance Measurement Plan

For this purpose, Embarq will provide the excluded data within 15 days upon request by any affected party and Commission Staff, for the first three reporting dates following implementation of a new exclusion.

Embarq Performance Measurement Plan

III. SERVICE GROUP TYPES

Service Group Type	Embarq	CLEC
RESALE		
Residential POTS	Residential POTS	Residential POTS
Business POTS	Business POTS	Business POTS
ISDN BRI	ISDN BRI	ISDN BRI

Line Sharing	Retail xDSL	Line Sharing
EELS	DS1/ISDN PRI, DS3, VGPL/DS0	EELS
Interconnection Trunks	ILEC Dedicated Trunks	Interconnection Trunks
LNP	LNP	LNP
Projects	Projects as defined below.	Projects as defined below.

INTERCONNECTION TRUNKS will be included in measures: 2, 7, 8, 11, 12, 13, 14, 19, 20, 21, 23, 25, 30, 31, 32, 33, 34.

LNP is considered a facilities based service group type. LNP will be a level of disaggregation for the following measures: 2, 4, 9, 15, 17a, 19, 20, 21, and 23. Service orders with multiple service group types will be categorized according to the service group type of the first access line entered on the order.

PROJECTS are defined as follows:

"Project is a planned event where terms and conditions in which work is performed is agreed to by both the CLEC, Embarq and any other party engaged in the provisioning process. To allow for successful turn-up of facilities or conversion of facilities, each party must negotiate, in good faith, the timelines that allow required activities to be

Embarq Performance Measurement Plan

met, equipment ordered, placed and tested to meet the overall objectives of the project. The timeline must meet the rule of reasonable and prudent business practices. If the activity is not agreed to be a project, the transaction will be reported in the appropriate service group type."

SERVICE ORDER TYPES

- **New Service Installations**
- **Service Migrations without Changes**
- **Service Migrations with Changes**
- **Move and Change activities**
- **Feature Changes**
- **Service Disconnects**

Embarq Performance Measurement Plan

IV. AUDITING

The Nevada Public Service Commission (FPSC) ordered at least one annual independent third-party comprehensive audit. Based on the results of the initial independent comprehensive audit and any future reviews outlined in the Review Procedures, FPSC staff shall determine whether the interval for additional comprehensive third-party audits should be modified during the first five years after initial implementation.

The cost for a comprehensive annual audit shall be borne by Embarq within the first five years after implementation of the Nevada Plan. During this time period, Embarq reserves the right to seek a waiver if it deems a comprehensive annual audit unnecessary.

Independent third-party auditors and audit scope shall be jointly selected by Embarq and the CLECs prior to initiating any third-party audit. If the parties cannot agree on the independent auditor, FPSC staff shall have final approval.

In addition to an audit, Embarq and the CLECs agree that the CLECs would have the right to mini-audits of individual performance measures during the year. When a CLEC has reason to believe the data collected for a measure is flawed or the reporting criteria for the measure is not being adhered to, it has the right to have a mini-audit performed on the specific measure upon written request (including e-mail), which will include the designation of a CLEC representative to engage in discussions with Embarq about the requested mini-audit. If, 45 days after the CLEC's written request, the CLEC believes that the issue has not been resolved to its satisfaction, the CLEC will commence the mini-audit upon providing Embarq with 5 business days advance written notice. Each CLEC would be limited to auditing five single measures during the year. The CLEC would pay for the mini-audit, including Embarq's reasonable associated costs and expenses, unless Embarq is found to be misreporting or misrepresenting data or to have non-compliant procedures, in which case, Embarq would pay for the mini-audit, including the CLECs' reasonable associated costs and expenses. If, during a mini-audit of individual measures, more than 50% of the measures in a major service category are found to have flawed data or reporting problems, the entire service category will be re-audited at the expense of Embarq. The major service categories for this purpose are:

- Pre-Ordering
- Ordering
- Provisioning
- Maintenance
- Network Performance
- Billing
- Database Updates
- Collocation
- Interfaces

Each mini-audit shall be submitted to the Commission as a proprietary document.

Embarq Performance Measurement Plan

V. REVIEW PROCEDURES

For the first two years after this Nevada Plan is implemented, collaborative reviews between Embarq and the CLECs are scheduled to be conducted every six months by FPSC staff. Based on input from the participants at each review and the need determined therein, FPSC staff will determine whether the interval for the next review should be adjusted.

Embargo Performance Measurement Plan

VI. DEFINITION OF TERMS

TERM	DEFINITION
Automatic Location Identifier (ALI)	The feature of E911 that displays at the Public Safety Answering Point (PSAP) the street address of the calling telephone number. This feature requires a data storage and retrieval system for translating telephone numbers to the associated address. ALI may include Emergency Service Number (ESN), street address, room or floor, and names of the enforcement, fire and medical agencies with jurisdictional responsibility for the address. The Management System (E911) database is used to update the Automatic E911 Location Identifier databases.
Affiliate	An entity that (directly or indirectly) owns or controls, is owned or controlled by, or is under common ownership or control with another entity. The Telecommunications Act defines "Own" as owning an equity interest (or equivalent thereof) of more than 10 percent, or as defined by state commissions."
Benchmark Measurable Standards	Benchmark measures have an agreed upon standard to determine compliance due the lack of a meaningful retail analog comparison.
Call Blocking	A condition on a telecommunications network where, due to a maintenance problem or an over capacity situation in a part of the network, some or all originating or terminating calls cannot reach their final destinations. Depending on the condition and the part of the network affected, the network may make subsequent attempts to complete the call or the call may be completely blocked. If the call is completely blocked, the calling party will have to re-initiate the call attempt.
Centralized Data Collection	Centralized Data Collection system collects hourly operational measurement data from switches/trunks groups for the LTD, and provides a direct feed to CIRAS. The information is used for traffic forecasting by trunk capacity planners.
Code Opening	Process by which new NPA/NXXs (area code/prefix) are defined, through software translations to network databases and switches, in telephone networks. Code openings allow for new groups of telephone numbers (usually in blocks of 10,000 or less with number pooling) to be made available for assignment to an ILEC's or CLEC's customers, and for calls to those numbers to be passed between carriers.
Common Channel Signaling System 7 (CCSS7)	A network architecture used to for the exchange of signaling information between telecommunications nodes and networks on an out-of-band basis. Information exchanged provides for call set-up and supports services and features such as CLASS and database query and response.
Common Transport	Trunk groups between tandem and end office switches that are shared by more than one carrier, often including the traffic of both the ILEC and several CLECs.
Completion	The time in the order process when the service has been provisioned and service has been deployed.
Completion Notice	A notice the ILEC provides to the CLEC to inform the CLEC that the requested service order activity is complete.
Coordinated Hot Cut	Coordinated Customer Conversion of Orders that have a due date negotiated between the ILEC, the CLEC, and the customer so that work activities can be performed on a coordinated basis under the direction of the receiving carrier.
Customer Requested Due Date	A specific due date requested by the customer which is either shorter or longer than the standard interval or the interval offered by the ILEC.
Customer Trouble Reports	A report that the carrier providing the underlying service opens when notified that a customer has a problem with their service. Once resolved, the status of the trouble is changed to closed.
Dedicated Transport	A network facility reserved to the exclusive use of a single customer, carrier or pair of carriers used to exchange switched or special, local exchange, or exchange access traffic.

Embarq Performance Measurement Plan

TERM	DEFINITION
Delayed Order	An order which has been completed after the scheduled due date and/or time
Diagnostic Measurable Standards	This indicates that the results per the measurement will be reported for analysis purposes only and are not subject to determination of compliance or non-compliance.
Directory Assistance Database	A database that contains subscriber records used to provide live or automated operator-assisted directory assistance. Including 411, 555-1212, NPA-555-1212.
Directory Listings	Subscriber information used for DA and/or telephone directory publishing, including name and telephone number, and optionally, the customer's address.
DS-0	Digital Service Level 0. Service provided at a digital signal speed commonly at 64 kbps, but occasionally at 56 kbps.
DS-1	Digital Service Level 1. Service provided at a digital signal speed of 1.544 Mbps.
DS-3	Digital Service Level 3. Service provided at a digital signal speed of 44.736 Mbps.
Due Date	The date provided on the FOC the ILEC sends the CLEC identifying the planned completion date for the order.
End Office Switch	A switch from which an end users' exchange services are directly connected and offered.
Firm Order Confirmation (FOC)	Notice the ILEC sends to the CLEC to notify the CLEC that it has received the CLECs service order, created a service request, and assigned it a due date.
Flow-Through	The term used to describe whether a LSR electronically is passed from the OSS interface system to the ILEC legacy system to automatically create a service order. LSRs that do not flow through require manual intervention for the service order to be created in the ILEC legacy system.
Held Order	An order for which the ILEC has issued a FOC, but whose due date has passed without it being completed.
Installation	The installation activity required to activate a service request.
Installation Troubles	A trouble, which is identified after service order activity and installation have been completed, on a customer's line. It is likely attributable to the service activity (within a defined time period).
Inside Wiring	The telecommunications wiring located at a customer's premises that extends beyond the demarcation point.
Interconnection Trunks	A network facility that is used to interconnect two switches generally of different local exchange carriers
Interface Outage	A planned or unplanned failure resulting in the unavailability or access degradation of a system.
Jeopardy	A failure in the service provisioning process which results potentially in the inability of a carrier to meet the committed due date on a service order
Jeopardy Notice	The actual notice that the ILEC sends to the CLEC when a jeopardy condition has been identified.
Lack of Facilities	A shortage of cable facilities identified after a due date has been committed to a customer, including the CLEC. The facilities shortage may be identified during the inventory assignment process, or during the service installation process. If no facilities are available, the ILEC will issue a jeopardy.

Embarq Performance Measurement Plan

TERM	DEFINITION
Line Sharing	Unbundling of the local loop to make the high-frequency portion of the local loop available to CLECs, while the physical line and low-frequency voice path continues to be provided by the ILEC. Line Sharing allows customers to receive both services (voice and data) on the same line, eliminating the need for consumers to procure a second line.
Local Exchange Routing Guide (LERG)	A Telcordia master file that is used by the telecom industry to identify NPA-NXX routing and homing information, as well as network element and equipment designations. The file also includes scheduled network changes associated with activity within the North American Numbering Plan (NANP).
Local Exchange Traffic	Traffic originated on the network of a LEC in a local calling area that terminates to another LEC in a local calling area.
Local Number Portability	A network technology that allows end user customers to retain their telephone number when moving their service between local service providers. This technology does not employ remote call forwarding, but actually allows the customer's telephone number to be moved and redefined in the network of the new service provider. The activity to move the telephone number is called "porting".
Local Service Confirmation	OBF term for a FOC
Mechanized Bill	A bill that is delivered via electronic transmission.
Meet Point Billing	A billing arrangement used when two or more LECs jointly provide access to and from an interexchange carrier (IXC) for inter LATA traffic. This arrangement can be Single Bill, where one LEC bills the IXC on behalf of both LECs and remits payment to the other LEC or Multiple Bill, where each LEC bills their portion directly to the IXC.
Missed Commitment Notification	A notice from ILEC to inform CLEC that the committed due date on an order has been missed.
Non-Recurring Charge	A rate charged for a product or a service that is assessed on a one-time basis.
NXX, NXX Code or Central Office Code	The three digit switch entity indicator that is defined by the "D", "E", and "F" digits of a 10-digit telephone number within the NANP. Each NXX Code contains 10,000 station numbers.
Ordering and Billing Forum (OBF)	Industry forum that works to develop national ordering and billing standards.
Other Charges and Credits	Partial month recurring and non-recurring charges, installation, and other charges other than basic monthly charges appearing on a bill.
Parity Measurable Standards	Indicates a retail analog process or system exists and can report the ILEC and ILEC Affiliate results to be compared to the CLEC results.
Parity by Design	Parity by Design occurs where the same process or system is used for both CLEC and ILEC and does not allow the opportunity to discriminate or to recognize differences between CLEC activity and ILEC activity. As such, the results calculated will apply for all CLECs and ILEC measurable standards.
Permanent Number Portability (also known as Local or Long Term Number Portability)	A network technology that allows end user customers to retain their telephone number when moving their service between local service providers. This technology does not employ remote call forwarding, but actually allows the customer's telephone number to be moved and redefined in the network of the new service provider. The activity to move the telephone number is called "porting".

Embarq Performance Measurement Plan.

TERM	DEFINITION
Physical Collocation	Shall have the meaning set forth in 47 C.F.R. Section 51.5.
Plain Old Telephone Service (POTS)	Refers to basic 2 wire analog residential and business services. Can include feature capabilities (e.g., CLASS features).
Projects	Project is a planned event where terms and conditions in which work is performed is agreed to by both the CLEC, Embarq and any other party engaged in the provisioning process. To allow for successful turn-up of facilities or conversion of facilities, each party must negotiate, in good faith, the timeline must meet the overall objectives of the project. The timeline must meet the rule of reasonable and prudent business practices. If the activity is not agreed to be a project, the transaction will be reported in the appropriate service group type.
Provisioning Troubles	A trouble report that is opened for a customer's existing or new service for a trouble identified between the time of the service order creation to the time of order completion. Provisioning troubles that are associated with a CLECs customers include troubles that occur and are reported during the conversion of an ILEC customer to a CLEC.
Query Types	Pre-ordering information that is available to a CLEC that is categorized according to standards issued by OBF, the FCC and/or the Nevada PSC.
Recurring Charge	A rate charged for a product or service that is assessed each successive billing period.
Reject	A status that can occur to a CLEC submitted local service request (LSR) when it does not meet certain criteria. There are two types of rejects: syntax, which occurs if required fields are not included in the LSR and content, which occur if invalid data is provided in a field. A rejected service request must be corrected and re-submitted before provisioning can begin.
Repeat Report	Any trouble report that is a second (or greater) report on the same telephone number/circuit ID and at the same premise address within 30 days. The original report can be any category, including excluded reports, and can carry any disposition code.
Service Group Type	The designation used to identify a category of similar services, e.g., UNE loops
Service Order	The work order created and distributed in ILECs systems and to ILEC work groups in response to a complete, valid service request.
Service Order Type	The designation used to identify the major types of provisioning activities associated with a service request
Service Request	The transaction sent from the CLEC to the ILEC to order services or to request a change(s) be made to existing services.
Standard Interval	The interval that the ILEC quotes to its customers with respect to how long it will take to provision a service request. These intervals are standardized by specific service type and type of service modification requested ILECs publish these standard intervals in documents used by their own service representatives as well as ordering instructions provided to CLECs. POTS services do not have standard intervals; their installation intervals are based on force available and workload. They may change as frequently as twice a day.
Subsequent Reports	A trouble report that is taken on a previously reported trouble prior to the date and time the initial report has a status of "cleared".
Summarized Charges	Billing charges that are aggregated on the bill, rather than individually itemized, e.g., local usage minutes on resale or retail calls, which are listed on the bill as "xx" minutes with no call detail.

Embarq Performance Measurement Plan

TERM	DEFINITION
Tandem Switch	Switch used to connect and switch trunk circuits between and among Central Office switches.
Time to Restore	The time interval from the receipt, by the ILEC, of a trouble report on a customer's service to the time service is fully restored to the customer.
Transport	A carrier facility medium in which transmission takes place. Transport carries voice and data from point A to point B, usually between two offices. Transport medium includes copper wire, fiber optics, microwave and satellite.
Trouble Cause Code	A code identifying the known or suspected cause of a trouble condition.
Trouble Disposition	A code identifying the end result of diagnostic and/or repair activities on a customer trouble report.
Usage Data	Data generated in network nodes to identify switched call data on a detailed or summarized basis. Usage data is used to create customer invoices for the calls.
Usage Records	The individual call records created in a switch to report the date, time, duration, calling and called numbers associated with a given call
Virtual Collocation	Shall have the meaning set forth in 47 C.F.R. Section 51.5.

VI. GLOSSARY OF ACRONYMS

ACRONYM	DESCRIPTION
ALEC	Alternative Local Exchange Carrier (term equivalent to CLEC)
ALI	Automatic Location Identifier (for E911 systems)
AS	Affecting Service (type of trouble condition)
BDT	Billing Data Tape
BRI	Basic Rate Interface (type of ISDN service)
CHC	Coordinated "Hot" Cut
CKT	Circuit
CLEC	Competitive Local Exchange Carrier (term equivalent to ALEC)
CO	Central Office
CPE	Customer Premises Equipment
CSR	Customer Service Record
DA	Directory Assistance
dB	Decibel
DDS	Digital Data Service
DID	Direct Inward Dialing
DS0	Digital Service 0
DS1	Digital Service 1
DS3	Digital Service 3
E911 MS	E911 Management System
EAS	Equal Access Service
EDI	Electronic Data Interchange
FOC	Firm Order Confirmation
GUI	Graphical User Interface
HDSL	High-bit-rate Digital Subscriber Line
HICAP	High Capacity Digital Service
IEC/XC	Inter-exchange Carrier
ILEC	Incumbent Local Exchange Carrier
IRES	Integrated Request Entry System
N, T, C	Service Order Types - N(new), T(to or transfer), and C(change)
ISDN	Integrated Services Digital Network
IW	Inside Wire
LATA	Local Access Transport Area
LERG	Local Exchange Routing Guide
LNP	Local (or Long Term) Number Portability

Embarq Performance Measurement Plan

ACRONYM	DESCRIPTION
LSMS	Local Service Management System
LSR	Local Service Request
MRC	Missed Appointment Reason Code
NANP	North American Numbering Plan
NDM	Network Data Mover
NPAC	Number Portability Administration Center
NXX	Telephone number prefix
OBF	Ordering and Billing Forum
OOS	Out of service (type of trouble condition)
OSS	Operations Support System
PBX	Private Branch Exchange
PON	Purchase Order Number
POTS	Plain Old Telephone Service
PRI	Primary Rate Interface (type of ISDN service)
PSC	Public Service Commission (term equivalent to PUC)
PUC	Public Utilities Commission (term equivalent to PSC)
SCP	Service Control Point
SGT	Service Group Type
SOT	Service Order Type
SS7	Signaling System 7
STP	Signaling Transfer Point
TN	Telephone Number
UNE	Unbundled Network Element
VGPL	Voice Grade Private Line
xDSL	(x) Digital Subscriber Line

Embarq Performance Measurement Plan

**A. JEOPARDY CODES
 Embarq Due Date - Specials**

Jeopardy Code	Description
1	Incorrect or Late Order
2	Related Order Not Issued
3	Related Order Not Completed
4	Pending Cancellation
5	Pending Due Date Change
6	Local Facilities Not Available or Late
7	Local Facilities Incorrectly Assigned
8	Local Facility Records Incorrect
9	Late Local Loop Makeup
10	Defective Local Facility
11	Access Customer Facilities Not Available
12	Connecting Company Facilities Not Available
13	CIRAS Records Incomplete or Inaccurate
14	Intracompany Facilities Not Available
15	Incorrect or Late Engineering
16	Late/Incorrect Info from Connecting Company
17	Translation Late or Unavailable
18	Unable to Meet Design Requirements
19	Central Office Equipment Not Installed
20	Circuit Order Equipment Late or Not Available
21	Defective Equipment
22	Customer Not Ready- LTD Work Complete
23	Customer Order Issues
24	No Access to End User Premise
25	Customer Not Ready - LTD Work Not Complete
26	System Not Available
27	System Edit/Error
28	Lack of Manpower
29	Weather Conditions
30	Work Completed on Time-Reported Late
31	Not Installed as Engineered
32	Connecting Company Not Ready
33	Original Date Met, Field RID Required Changes
34	Natural Disaster
35	Union Issues

Attachment Integra-78c

Embarq Performance Measurement Plan

36	Overtime/budget Restriction
37	Order/tech not dispatched
38	Dark Fiber LAM interval
39	Maintenance resource priority
40	Date not signed off by owner
41	No Response to Escalation
42	HDSL Status Not Provided
43	Late Engineering Order Confirmation (EOC)/Estimated Completion Date (ECD)
44	To be Worked by Intergrated Tech on PTD
45	Switched Conversion Delayed
46	CDDD Less than DVA- Short Interval
47	Live CKTS on Higher Level CKT being Disc.

Note: Bolded codes are exclusion reasons outside of Embarq's control, including customer-caused reasons.

Embarq Performance Measurement Plan

**B. MISSED APPOINTMENT REASON CODES
 Embarq - Retail**

Code	Customer Reasons - Description
AB	This code will indicate working service was found at the time of installation and delayed the original due date installation.
CL	The due date was not met due to inaccurate or incomplete information received from the customer to work the service order.
PO	The port was not activated by the CLEC on the due date
RD	The customer called and requested a different date prior to the appointed due date.
SA	Plant employee attempted to complete order on appointed date but could not gain access to the customer's premise.
SO	The installation was delayed because customer requested an instrument that is not normally offered and it had to be special ordered.
SR	The customer indicated he was not ready for completion of the request on the original due date or provided incomplete or incorrect information which prohibited completion of the request on the original due date (trip was made).

**MISSED APPOINTMENT REASON CODES
 Embarq - Retail**

Code	Company Reasons - Description
PL	Unanticipated plant workload precluded the completion of the order on the original due date.
SE	Request was delayed because there was a temporary lack of standard station equipment.
PF	Lack of plant facilities delayed the completion of the order.
PB	Bad cable pair or cable plant exists.
IW	Inclement weather delayed installation.
CE	Commercial provided incomplete or inaccurate information.
ME	Marketing provided incomplete or inaccurate information.
CO	Any other Company Reason.

Embarq Performance Measurement Plan

C. DISPOSITION CODES
Embarq

Code	Description
CAN	Cancellation of ticket at customer request
CC	Came Clear
CO	Central Office – The trouble was found in central office equipment. This includes concentrators, remotes, OPMs.
CPE	Customer Provided Equipment – Trouble found in the end user's equipment or wiring. This also includes extended demarc. If the problem was customer action, XCC is used.
FAC	Facility – Anything from the local distribution frame protector to the protector on the end user site.
INF	Ticket created for informational purposes only
HSD	High Speed Data
OTH	Other – Embarq LTD Network
ND	Natural Disaster – Hurricane, Earthquake, Tornado, Volcano, Typhoon
STN	Station – Network Interface Devices (NIDs), loopback devices, jacks, up to the demarc
TOK	Test Okay/No Trouble Found – Could not identify the problem the customer reported either through remote or field testing.
TRN	Transport – Troubles isolated to an outage caused by a transport issue in the Embarq network. These outages are generally isolated to DS3 or higher service types.
XCC	IXC/CLEC/CLEC
CCO	Connecting Company – The problem was identified in connecting company network or equipment, referrals to connecting company.
TT	Translations Trouble
UNK	Unknown
PRV	Provisioning Trouble

Note: Bolded codes are exclusion reasons outside of Embarq's control, including customer-caused reasons.
