

Washington Docket No. UT 100820
Response to Integra Data Request No. 166
Response Date: October 1, 2010

Integra Data Request No. 166:

Is the interface that CenturyLink currently uses to process ASRs for CLECs a UOM interface?
If so:

- a. Identify the interface;
- b. State your basis for asserting that the interface is UOM compliant, consistent with ATIS guidelines or standards;
- c. Provide CenturyLink documentation dated or posted before the transaction announcement date indicating that the interface is UOM compliant.

CenturyLink Response:

- a. Yes, CenturyLink provides two industry standard interfaces for ASR processing today, a UOM compliant interface and a mech spec compliant interface. Both interfaces are part of the EASE ASR application.
- b. CenturyLink's UOM compliance gateway is provided by a third party vendor, Synchronoss. Synchronoss is contracted to provide both a UOM compliant gateway and business rules per ATIS guidelines. CenturyLink reviews the compliance using internal staffs that participate regularly in the ATIS / Ordering and Billing Forum. Interoperability testing is performed for each customer implementation.
- c. CenturyLink does customer specific UOM interoperability testing. Unlike Qwest, however, there is no requirement to maintain documentation stating that the interface is UOM compliant. Therefore, no such documents exist
