

**Washington Docket No. UT 100820**  
**Response to Integra Data Request No. 167**  
**Response Date: October 1, 2010**

**Integra Data Request No. 167:**

Is the interface that CenturyLink currently uses to process LSRs for CLECs a UOM interface? If so:

- a. Identify the interface;
- b. State your basis for asserting that the interface is UOM compliant, consistent with ATIS guidelines or standards;
- c. Provide CenturyLink documentation dated or posted before the Merger Announcement Date (April 21, 2010) indicating that the interface is UOM compliant.

**CenturyLink Response:**

- a. Yes, CenturyLink provides an industry standard UOM compliant interface, as well as a proprietary batch interface for LSR processing. Both interfaces are part of the EASE LSR application.
- b. CenturyLink's UOM compliance gateway is provided by a third party vendor, Synchronoss. Synchronoss is contracted to provide both a UOM compliant gateway and business rules per ATIS guidelines. CenturyLink reviews the compliance using internal staffs that participate regularly in the ATIS / Ordering and Billing Forum. Interoperability testing is performed for each customer implementation.
- c. CenturyLink does customer specific UOM interoperability testing. Unlike Qwest, however, there is no requirement to maintain documentation stating that the interface is UOM compliant. Therefore, no such documents exist
