Subject: Water Heater Rental

Dear Public Counsel,

I understand that Puget Sound Energy is discontinuing the water heater rental program and are offering three options for further use. I am sure that they have an idea of the relative costs and conditions involved with each option. When will this information be shared? I am concerned that consumers will have very little time to consider the relative merits of each option and be rushed into making hasty -and irreversible - decisions.

Sincerely,

Brenda Swidler
