Subject: Fossil Fuels
Date: Thursday, February 8, 2018 2:48:40 PM

Simple request: Get out of fossil fuels. The vast majority of scientific evidence makes clear the necessary game changer has to include a dramatic shift in our carbon output. The plan is way too weak to address our needs for a sustainable future on our beautiful planet. We know the bad news now you get busy and address it with wind and sun. Forget the capitalistic agenda do something !!
