Re: Docket No. UE-160082 – Avista Utilities Final Report on Electric Vehicle Supply Equipment Pilot Program

Dear Mr. Johnson,

In compliance with Order 01 in Docket UE-160882, Avista Corporation's, dba Avista Utilities (Avista or Company) hereby submits its "Final Report on Electric Vehicle Supply Equipment Pilot Program."

In Order 01 the Commission stated that, "*Avista must also file in this docket quarterly reports documenting program participation levels, expenditures, and revenues for each service offered under the Pilot Program beginning August 1, 2016. Our approval of this Pilot Program is primarily based on the benefits associated with collecting information on EV charging behavior and the potential for ratepayer benefits associated with shifting EV charging to off-peak. Accordingly, it is essential that Avista collect adequate information to assess charging behavior. Over the course of the Pilot Program, we expect Staff to recommend the collection and reporting of additional data if required to provide enough information to evaluate accurately the program's success upon its completion... The final report should include a brief narrative evaluation of the program*"

Avista has thoroughly assessed the results of the Program and included the Commission's requirements in the final report, including any additional data requested by Commission Staff
