I came to the Renton meeting yesterday and was pleasantly surprised at how many people were there and how many people spoke. I couldn't stay long enough to take a turn so am e-mailing.

As a member of Sierra club for over 30 years you already know how I feel--the speakers said it all.

So my comment--I pay extra per month on my bill for solar and wind. After listening to speakers for an hour and a half yesterday, I am wondering if my money is really going towards cleaner energy or if it is going to coal. I suspect it is just being lumped all together. Am I wasting my money? Tell me honestly.
