

Charlie,

Our OPS Manager and Paper Machine Production Manager have been doing some brainstorming and they have some different ideas about handling of the waste stream coming out of the OCC plant.

They would like to meet with you and your team to walk through their ideas and get your input. Would you and your team be available to come to the mill tomorrow sometime for a tour and discussion.

Please let me know your availability for either tomorrow or Monday, keeping in mind that we expect to start the process of feeding materials next week. so the sooner the better.

Thanks.
