**RE: Do Not Redocket – Electric Tariff Revision – Supplemental Document
Docket UE-231031 (Advice No. 2023-60)**

Dear Executive Director Killip:

In connection with Docket UE-231031, Puget Sound Energy (“PSE”) hereby submits a supplemental document about the attributes of the currently active Schedule 150 Customer-Generator systems that have been established in accord with Chapter 80.60 RCW Net Metering of Electricity.

This supplemental document makes available to all interested parties detailed information about these active Schedule 150 Customer-Generator systems as of December 31, 2023. PSE provided this document to the staff of Washington Utilities and Transportation Commission (“Commission Staff”) at the request of the Commission Staff during their review of this tariff filing. Notably, about 26% of these Schedule 150 Customer-Generator systems are located in Highly Impacted Communities (as defined in PSE’s Clean Energy Implementation Plan (“CEIP”) that was approved under Docket UE-210792).

The supplemental document provides information by census block about these active Schedule 150 Customer-Generator systems:

- Vulnerability Population status and Highly Impacted Community statuses
- Census block percentage of area median income
- Net metering participation and capacity

This filing is made for informational purposes only. There are no changes associated with this filing to any of the proposed tariff sheets, including the issue date of December 20, 2023, and effective date of February 29, 2024.

Jeff Killip, Executive Director and Secretary
