

## Colloquy 95

1 MS. SACILOTTO: Jean, can you --

2 ALJ ARLOW: I guess the question is whether or  
3 not a simple software modification to the application  
4 program might do the job?

5 MR. WILSON: Or, Your Honor, I know that Qwest  
6 has report generating capabilities out of LFACS to get  
7 the information as you correctly asked. They have  
8 mechanisms to determine spare facilities. This may be  
9 the LAIS and LEAD systems that actually generate the  
10 reports out of LFACS. I think either Ms. Liston doesn't  
11 know this or there's some question we haven't asked  
12 here.

13 MS. KILGORE: And I would just like to point  
14 to Qwest Exhibit 425, which is attached to Ms. Liston's  
15 direct testimony, dated June 5 of 2001. And the  
16 footnote on page 3 of that exhibit would indicate that  
17 information on spare facilities not connected to the  
18 switch is available through the LFACS database.

19 ALJ ARLOW: Which page of Qwest 425 is that?

20 MS. KILGORE: It's page 3, Your Honor.

21 ALJ ARLOW: Before I get too far along here, I  
22 wanted to make sure that any questions that staff might  
23 have could be raised at this time.

24 Mr. Harris?

25 MR. HARRIS: Yes. I'm Tom Harris.
