

dear sirs.

I have been a locomotive engineer at bnsf,s stacy st.yd. td.for many years. I have seen many close calls involving private citizines doing busines at SODO center, home depot,seahawks stadium ,the ballpark and many other retail busineses. to them the railroad yard is aplace to walk through with their children in tow. the citizens of washington deserve a full yime engineer to protect them.

thank you
