month and were getting paid to take power from California. This allowed us to sell off our extra gas for plant fuel.

Comment/Question	Response	Follow-Up					
In June, we included incremental EIM O&M costs in the Idaho PCA calculation. We used YTD incremental costs of ~\$300K.							
We noted account 456100 transmission revenue was about \$1M higher than forecast and historical periods. 2 new firm contracts went into effect in May which add around							
\$650K per month to revenue. In addition, there was an increase in other non-firm transmission activity.							

Also during June, there were negative prices coming out of the EIM in California due to an overabundance of solar. We were able to back down our generation during the

Avista Corp. - Resource Accounting

Washington Energy Recovery Mechanism (ERM) Current Year Deferral

Changes Semiannually on January 1 and July 1

The rate is based on Avista's actual cost of debt, updated semiannually.

The actual cost of debt calculated at 6/30 will be used for the interest calculation from July through December.

The actual cost of debt calculated at 12/31 will be used for the interest calculation from January through June.

Interest will be accrued monthly and compounded semi-annually.

Interest is calculated using the prior month ending balance plus 1/2 month of current month charges times the current after tax interest rate

McLelland, lan

From: Meister, Keri

Sent: Friday, July 8, 2022 8:13 AM **To:** McLelland, Ian; Hossack, Jennifer

Subject: RE: Transmission Revenue

Here is the information on the 2 new contracts for transmission revenue, account 456100:

Idaho Power \$274,833/month LT Firm PTP Transmission Service 202205-202704

This is on top of the \$274,833/month we already charge on their existing contract for 202105-202604

Powerex \$376,522/month LT Firm PTP Transmission Service 202205-202404

On top of those 2 new contracts, June activity also included non-firm activity that was higher than normal for Macquarie Cook Energy, Morgan Stanley and Vitol. I don't think we would add anything additional to the forecast for those as they are short term items but let me know if you need anything further to get a good forecast.

Thank you,

Keri

Subject: RE: Transmission Revenue

Good morning!

It does make sense, and will continue to be high. We added 2 long term contracts in May, for Idaho Power and Powerex. Their combined new LT Firm PTP transmission is \$995k/month alone.

Thank you,

Keri

Subject: Transmission Revenue

Hi Keri,

I was looking at account 456100 and we had \$3.3M in sales to that account during June. We have never seen it that high before, in fact that highest I have seen going back to 2011 is only \$2.3M. Can you confirm whether the \$3.3M makes sense. Thanks.

0.00 \checkmark 2,158,444.01 Annual transfer of Deferral balance to amortization

DJ475 - Washington REC Deferral (Current Amortization)

The rate is based on WA Rate Order for REC deferral

Interest will be accrued monthly and compounded semi-annually.

Interest is calculated using the prior month ending balance plus 1/2 month of current month charges times the current monthly interest rate

202107

Transferred all deferral amounts from 186324 to amortization account 186322 July forward deferral amounts get recorded to 186323

Interest rate remains at 6.654% per UE-190334

Conversion Rate Factor of .955631 per UE-190334 remains the same

WA I-937 RPS Compliance amount will be recorded on an NSJ and go to account 186323 - (2 YR LAG FOR COMPLIANCE) - 2019 ID Allocation = \$712,187.45

PT ratio stays the same as previous order. As per Annette on 7/27/2021, there will be a change for next year due to a power supply adjustment in the current GRC effective Oct-2021.

Explanation:

For WA I-937 RPS Compliance, we retired Hydro RECs from 2019. Retirement of RECs for WA purposes eliminated the ability for ID to recognize revenue if the RECs would have been sold.

To: Groome, Carolyn

Cc: McLelland, Ian; Lyons, John **Subject:** Idaho lost REC revenue

We get a 20% apprenticeship credit for Palouse/Rattlesnake wind RECs in WA for I-937 so when John Lyons does the filing, he grosses up the REC quantity accordingly.

As far as Idaho is concerned, their value would be based on the 1x quantity.

Incremental hydro RECs are not in WREGIS; that's something John handles. They have no market value outside WA.

The Table showing below that is in the Order has a disconnect to your number on your spreadsheet of 471,368. Ian wants to know why that is. Also, do we not add the Incremental Hydro of 157,657?

Table 1: Avista's 2019 Renewable Resource Target and Compliance Plan

2019 Target (MWh)	Incremental Hydro (MWh)	2018 RECs	2019 RECs	Purchased RECs (unbundled)	Total Resources in 2019 (MWh)
514,144	157,657	05	653,192	0	810,849

BEFORE THE WASHINGTON UTILITIES AND TRANSPORTATION COMMISSION

In the Matter of

DOCKET UE-190445

AVISTA CORPORATION'S

ORDER 01

Renewable Energy Target Progress Report under RCW 19.285.070 and WAC 480-109-210

ORDER APPROVING COMPLIANCE WITH ELIGIBLE RENEWABLE ENERGY TARGET REPORTING REQUIREMENTS FOR 2019

BACKGROUND

- The Energy Independence Act (EIA or Act)¹ requires qualifying electric utilities to obtain certain percentages of their electricity from eligible renewable resources. The Washington Utilities and Transportation Commission (Commission) enforces compliance with the EIA by investor-owned utilities.² Ultimately, the Commission must determine "whether the utility has generated, acquired or arranged to acquire enough renewable energy credits or qualifying generation to comply with its renewable resource target."³
- The Commission has implemented these requirements by establishing a two-step compliance process. Because a utility may comply with its renewable portfolio standards (RPS) obligation by using renewable energy credits (RECs) acquired in the year after the target year, ultimate compliance for 2019, for example, may be demonstrated as late as June 1, 2021. Accordingly, there will be two Commission decisions for each year's compliance: (1) a determination that the Company has enough resources to meet the 9 percent target; and (2) the retrospective compliance decision. Before the Commission is the initial resource-adequacy filing made by Avista Corporation (Avista or Company) for its 2019 obligation. The Commission will consider Avista's compliance with its 2019

¹ Chapter 19.285 RCW.

² RCW 19.285.060(6).

³ WAC 480-109-210(3)(b).

⁴ WAC 480-109-210(1) and (6).

target when Avista requests such a finding, which the Company must do through a filing in this docket no later than June 1, 2021.

On May 30, 2019, Avista filed with the Commission its 2019 RPS Report, which identified a 2019 target of 514,144 megawatt-hours (MWh). On June 21, 2019, Avista filed a revised report unredacting its incremental cost information and correcting work paper inconsistencies. Table 1, below, summarizes Avista's 2019 target and the total amount of resources that the Company had acquired by January 1, 2019:

Table 1: Avista's 2019 Renewable Resource Target and Compliance Plan

IM

	2019 Target (MWh)	Incremental Hydro (MWh)	2018 RECs	2019 RECs	Purchased RECs (unbundled)	Total Resources in 2019 (MWh)	
\checkmark	514,144	157,657	0^{5}	653,192	0	810,849	

- Avista seeks an order from the Commission confirming that the Company has complied with the Commission's EIA reporting requirements and accepting the Company's calculations and eligibility of the renewable resources identified in the RPS Report for 2019.
- On June 10, 2019, the Commission issued a Notice inviting interested persons to file written comments on Avista's RPS Report. During the comment period, the Commission received written comments from Commission staff (Staff) and written comments from the NW Energy Coalition (NWEC). NWEC commended the Company for meeting its RPS target without relying on alternative compliance methods. NWEC also expressed reservation regarding Avista's long-held assumption that using a combined cycle combustion turbine (CCCT) was adequate for calculating noneligible resource costs, which NWEC maintains should include the social cost of carbon. Overall, NWEC was pleased that the Company met its target and recommends that the Commission approve the report.
- Based on the information that the Company provided in its RPS Report and supplemental filing, Staff believes that Avista correctly calculated its 2019 RPS target, and that it has acquired sufficient resources to meet that target. Although Commission rules require the Company to document its use of renewable resources under various renewable energy programs in its annual report, Staff requests the Commission require Avista to include

⁵ Avista has no excess Renewable Energy Credits (RECs) from 2018 that could be used toward its 2019 target.

- that information in its final compliance report, which will allow Staff to determine whether its resources meet EIA requirements.
- Staff recommends that the Commission issue an order in this docket determining that: (1) the 2019 renewable energy target for Avista is 514,144 MWh; (2) Avista has demonstrated that, by January 1, 2019, the Company acquired at least 514,144 MWh of eligible renewable resources, equivalent RECs, or a combination of the two, sufficient to supply at least 9 percent of its load for 2019; (3) Avista has complied with the June 1, 2019, reporting requirements pursuant to WAC 480-109-210; (4) Avista has performed its required five-year incremental hydropower method three evaluation and may now switch to method one to calculate its incremental hydropower contribution starting in 2019; (5) Avista will switch to method one to calculate its incremental hydropower contribution in 2019 and subsequent years to more accurately estimate yearly generation at eligible hydropower facilities; and (6) in its final compliance report for 2019 required by WAC 480-109-210(6), Avista must provide details about which certificates were used for its various renewable energy programs.

DISCUSSION

- The Commission accepts Avista's calculation of 514,144 megawatt-hours as the Company's renewable energy target for 2019 and determines that Avista has identified sufficient resources to be able to meet that target. The Commission will make its final determination about whether Avista has met its 2019 target when the Company requests such a finding, no later than June 1, 2021.
- Avista has completed its required five-year incremental hydropower method three evaluation, and now requests permission to switch to method one to calculate its incremental hydropower contribution starting in 2019. We grant Avista's request. Switching to method one to calculate its incremental hydropower contribution starting in 2019 and continuing in subsequent years will more accurately estimate yearly generation at eligible hydropower facilities.
- To assist Staff with determining whether Avista's resources meet EIA eligibility requirements, Avista must provide details about which certificates were used for its various renewable energy programs, as required by WAC 480-109-210(2)(d)(i), in its final compliance report for 2019.

FINDINGS AND CONCLUSIONS

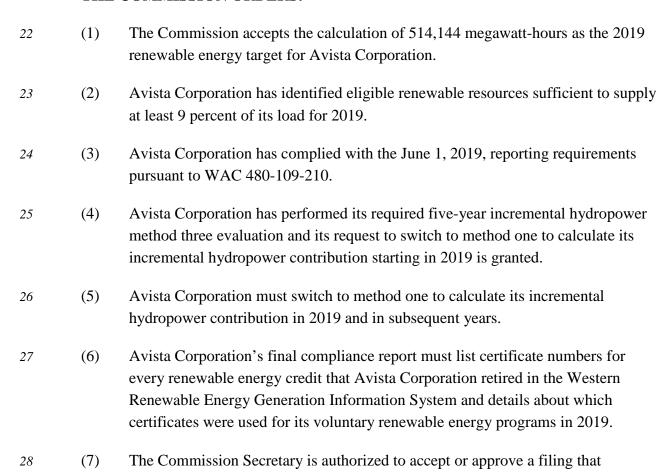

(1) The Commission is an agency of the state of Washington vested by statute with 11 the authority to regulate the rates, regulations, practices, and accounts of public service companies, including electric companies. 12 (2) Avista is an electrical company and a public service company subject to Commission jurisdiction. (3) Avista serves more than 25,000 customers within the State of Washington and is a 13 "qualifying utility" within the meaning of RCW 19.285.030(18). 14 (4) Avista has properly calculated its renewable energy target for 2019 to be 514,144 megawatt-hours. 15 (5) By January 1, 2019, Avista had acquired sufficient eligible renewable resources to supply at least 9 percent of its load for the remainder of 2019. (6) Avista has met the reporting requirements of RCW 19.285.070 and 16 WAC 480-109-210. These reporting requirements include Avista's plan for meeting its RPS obligation for the remainder of 2019. (7) Avista has performed its required five-year incremental hydropower method three 17 evaluation and its request to switch to method one to calculate its incremental hydropower contribution starting in 2019 should be granted. (8) Avista must switch to method one to calculate its incremental hydropower 18 contribution in 2019 and in subsequent years. 19 (9) Pursuant to WAC 480-109-210(4), Avista must provide a summary of its RPS Report to its customers, by bill insert or other suitable method, within 30 days of the date of this Order. 20 (10)Pursuant to WAC 480-109-200(3), Avista must register in Western Renewable Energy Generation Information System (WREGIS) all Company-owned incremental hydropower facilities on which the Company intends to rely for compliance with RPS requirements. (11)Pursuant to WAC 480-109-210(6), Avista must file a report no later than June 1, 21

2021, that lists the certificate numbers in WREGIS the for every megawatt-hour

and renewable energy credit that Avista retired to meet the January 1, 2019, target.

ORDER

THE COMMISSION ORDERS:

complies with the requirements of this Order.

DATED at Olympia, Washington, and effective August 8, 2019.

WASHINGTON UTILITIES AND TRANSPORTATION COMMISSION

DAVID W. DANNER, Chairman

ANN E. RENDAHL, Commissioner

JAY M. BALASBAS, Commissioner
