RE: Advice No. 14-01—Revisions to Street Lighting Schedule Provisions and New LED Street Lighting Service

Dear Mr. King:

In accordance with RCW 80.28.060 and WAC 480-80-105, PacifiCorp d/b/a Pacific Power & Light Company, (the Company) submits for filing the following proposed tariff revisions applicable to Pacific Power's electric service in the state of Washington. The Company respectfully requests an effective date of March 1, 2014.

Second Revision of Sheet No. 15.1	Schedule 15	Outdoor Area Lighting Service—No New Service
First Revision of Sheet No. 15.2	Schedule 15	Outdoor Area Lighting Service—No New Service
Second Revision of Sheet No. 51.1	Schedule 51	Street Lighting Service—Company-Owned System
First Revision of Sheet No. 51.2	Schedule 51	Street Lighting Service—Company-Owned System
Original Sheet No. 51.3	Schedule 51	Street Lighting Service—Company-Owned System
Second Revision of Sheet No. 52.1	Schedule 52	Street Lighting Service—Company-Owned System No New Service
Original Sheet No. 52.2	Schedule 52	Street Lighting Service—Company-Owned System No New Service
First Revision of Sheet No. 53.2	Schedule 53	Street Lighting Service—Customer-Owned System
First Revision of Sheet No. 57.3	Schedule 57	Mercury Vapor Street Lighting Service—No New Service
First Revision of Sheet No. R14.7	Rule 14	General Rules and Regulations—Line Extensions

The purpose of this filing is threefold: (1) to revise certain street lighting tariffs to better clarify provisions of service for street lighting customers and create consistency across street lighting schedules; (2) to update Rule 14 for street lighting; and (3) to introduce light-emitting diode (LED) lighting as the replacement for high pressure sodium (HPS) lighting. Following is a description of the tariff revisions requested in this filing.

Rule 14—Section III

A new Section D is added for street lighting that provides an extension allowance equal to five times the annual revenue from the lights to be added. The customer must provide a non-refundable advance for costs exceeding the extension allowance.

Schedule 15—Outdoor Area Lighting Service (No New Service)

Service provisions are added to be consistent with provisions in other street lighting service schedules.

Schedule 51—Street Lighting Service—Company-Owned System

The primary purpose of these revisions is to replace high pressure sodium vapor (HPS) lighting with LED as the Company's functional roadway lighting offering in Schedule 51. Since LED lighting is more energy efficient than HPS lighting and requires less maintenance, this change will help the Company meet energy efficiency targets consistent with the Washington Energy Independence Act, I-937.

With this change, LED would be the sole option for new non-decorative, "functional" installations and for replacement of other types of Company-owned fixtures that are beyond repair. LED would be offered in flat rate pricing in four "HPS equivalent" sizes. Decorative HPS would continue to be offered until the cost and availability of LED fixtures are more comparable to HPS.

Related changes are made to the service provisions in Schedules 51, 52, and 57 specifying that fixtures beyond repair will be replaced with LED.

In addition, the following changes to service provisions are being made:

- A revision to provision 3 to clarify the process for reporting the repair of inoperable lights.
- A revision to service provision 5 referencing the extension allowance changes made in Rule 14, Section III, D.
- A revision to service provision 7 to clarify the temporary disconnection of lights. Primarily as a result of economic uncertainties, the Company is fielding inquiries from customers contemplating having a number of lights disconnected to reduce billing obligations. A revision is also made to provide the Company with the latitude to remove facilities that sit idle after 12 months.
- Addition of service provision 10 specifying obligations surrounding the installation of vandalism and glare shielding.

- Changes to the Terms of Contract section to provide for minimum notification days for requests for removal and to properly allocate removal costs to the party requesting the work.

Schedule 52—Street Lighting Service—Company-Owned System (No New Service)

Addition of service provisions and termination of service language similar and consistent with Schedule 51.

Schedule 53—Street Lighting Service—Customer-Owned System

Clarification of language in service provision 1.

Removal of reference to Company repairing and invoicing customer-owned lights in service Provision 2. The Company no longer offers maintenance on customer-owned lights.

Addition of language to service provision 3 stating electrical connections to Company facilities must be performed by Company personnel or contractors.

Schedule 57—Mercury Vapor Street Lighting Service (No New Service)

Addition of special service provisions consistent with Schedule 51.

Changes are made to the Terms of Contract section. These changes provide for minimum notification days for requests for removal and to properly allocate removal costs to the party requesting the work.

The Company respectfully requests an effective date of March 1, 2014, for these tariff changes. However, in order to prepare inventory and notify customers prior to the effective date, the Company requests approval at the February 14, 2014 open meeting.

If you have any questions, please contact Bryce Dalley, Director, Regulatory Affairs & Revenue Requirement, at (503) 813-6389.

Sincerely,

William R. Griffith
Vice President, Regulation
