# **UTC Incident Investigation Form**

Notification ID:	Investigation ID: 6621
Houndarian and	internigenen interniet official

Inspector Name:	Derek Norwood	
Date Report Submitted to Chief Engineer:	January 13, 2016	
Date Report Reviewed & Approved by Chief Engineer:	Joe Subsits, 2/26/2016	

Operator:	Cascade Natural Gas Corporation (CNGC)
District/Unit:	Walla Walla
Location:	602 E Main St. Walla Walla, WA
Incident Date:	July 2, 2015

#### Description:

On July 2, 2015, Town and Country Tree Service (Town and Country) was removing a tree at 602 E Main St., Walla Walla, WA. As a part of the removal, Town and Country was grinding the tree stump and during that process damaged a 1" steel service. The Damage Incident Reporting Tool (DIRT) report submitted on July 10, 2015 by Cascade Natural Gas Corporation (CNGC) indicated that a one-call center was not notified. One address was evacuated as a result of the damage.

#### Facts/Chronology of Events:

On July 2, 2015, Town and Country damaged a CNGC natural gas service line. CNGC submitted a 30-day report to the commission on July 7, 2015 and a DIRT report on July 10, 2015. Both the 30-day report and the DIRT report indicated that Town and Country had not requested locates prior to excavation. CNGC was notified of the blowing gas at 6:58 pm, CNGC arrived on site at 7:13 pm and the pipeline was made safe at 8:20 pm on July 2, 2015.

Commission staff (staff) spoke over the phone with Larry Moore of Town and Country on December 9, 2015 at 10:40 am. Larry told staff that the work being done was for Whitman College, who had already requested locates (Ticket #15181685). Larry was aware that they are required to request their own locates. However, Larry did not request locates on this job because he was unaware they were grinding the stump. Larry was told by Whitman College that locates had been requested and no utilities were near the tree. According to CNGC, the locate request did not mention stump grinding. Also, according to CNGC, the tree to be removed was outside of the white marks and outside the area described in the locate request therefore they did not locate the service.

Information from CNGC was obtained via the 30-day report, the DIRT report and an email from

# **UTC Incident Investigation Form**

Kevin McCallum received on January 12, 2016. The information from Town and Country was verified during a phone call with Scott Towslee of Whitman College on January 11, 2016 at 1:43 pm.

#### **Causes/Contributing Factors:**

In the course of this investigation, staff determined that the damage incident was caused by locates not being request for the area of the work to be done. Town and Country is required to request locates for the work they will be doing and they did not in this instance.

### Regulatory Analysis/ Violations:

RCW 19.122.030(1)(a) states that excavators must notify a one-call locator service prior to excavation, Town and Country did not request utility locates and therefore is in violation of this code.

### Follow up/ Recommendations:

Staff recommends pursuing a \$1,000 penalty against Town and Country for this violation.
