### Details

**Comments** Amphibious tours are a great way for tourists to be able to see and explore Seattle, and they can bring in a lot of business to smaller local institutions that may stay off the radar for most tourists. Despite negative sentiments towards similar companies in the past, safety standards for these types of tours and vehicles tend to be much higher than normal due to both Coast Guard and DOT regulations. These tours have been very popular in Seattle before and likely will be again
