#### **PUGET SOUND ENERGY Electric Tariff G**

#### **SCHEDULE 51** LED (Light Emitting Diode) LIGHTING SERVICE **COMPANY OWNED**

#### **AVAILABILITY OF CUSTOM LED LIGHTING SERVICE:**

- 1. This schedule is available to all Customers contracting for Company owned and maintained LED and Smart LED lighting service for illumination of streets, highways, and other areas with a new or existing lighting system. Smart LED lighting service will be available on or after February 15, 2022.
- 2. Service under this schedule may be pursuant to a service agreement, which shall be consistent with this schedule and shall be of a standard form provided by and satisfactory to the Company.
- 3. All non-standard equipment is subject to approval by the Company prior to installation.
- 4. Service under this schedule is effective for a minimum period of fifteen (15) years for lights installed by the Company on or after August 1, 2000, unless
  - (a) a subsequent customer requests service or;
  - (b) the facilities are removed, whereupon appropriate removal charges shall be paid. After expiration of such term, service shall continue on a year-to-year basis until terminated upon one (1) year's notice in writing. Such term may be adjusted by the Company for existing systems purchased by the Company, based on the estimated remaining life and purchase price.
- 5. Where necessary, the Customer shall obtain for, or grant to, the Company necessary permits and/or operating rights to place and/or maintain lighting facilities on public streets, highways, and public areas without expense to the Company. In conditions where it is necessary to place any lighting facilities on private property, the customer shall obtain and furnish suitable easements without expense to the Company.
- 6. Service under this schedule is available only for (i) lighting systems that are newly constructed and Company owned that utilize underground circuitry or, upon approval of the Company, utilize overhead circuitry and (ii) existing LED lighting systems upon purchase by the Company. The Company shall not be obligated to install overhead circuitry or purchase an existing system. Lighting systems shall include all of the following: decorative or custom poles, circuitry, decorative or custom LED luminaires, photocells or Smart Street Light Controls and necessary bracket arms. "Smart Street Light Controls" means Advanced Metering Infrastructure ("AMI") intelligent nodes installed in the network of street lights, which provide Smart LED lighting service features including the ability to receive street light outage alerts, support dimming schedules, and measure load side energy, power, voltage, instantaneous current, and power factor. The Company will furnish all necessary labor, material and supplies for the installation, servicing and maintenance of lights under this schedule, except as provided in paragraph 8 of the Special Terms and Conditions herein.

# SCHEDULE 53 STREET LIGHTING SERVICE

#### **AVAILABILITY:**

- 1. Service is available for new and existing Customer-owned lighting and for existing Company-owned lighting but service for new Company-owned lighting is limited as described herein.
- 2. All non-standard equipment is subject to approval by the Company prior to installation. For this purpose, Light Emitting Diode ("LED") equipment and Smart Street Light Controls are considered non-standard unless the Customer is receiving service for Company-owned Smart LED Lights. "Smart Street Light Controls" means Advanced Metering Infrastructure ("AMI") intelligent nodes installed in the network of street lights, which provide Smart LED lighting service features including the ability to receive street light outage alerts, support dimming schedules, and measure load side energy, power, voltage, instantaneous current, and power factor. Smart LED lighting service will be available on or after February 15, 2022.
- 3. Where necessary, the Customer shall obtain for, or grant to, the Company necessary permits or operating rights to place lighting facilities on public streets, highways, and public areas without expense to the Company. In conditions where it is necessary to place any lighting facilities on private property, the Customer shall obtain and furnish suitable easements without expense to the Company.
- 4. In areas with Company-owned underground electric distribution facilities the Company shall only connect Customer-owned street lights utilizing underground circuitry.
- 5. In areas with Company-owned overhead electric distribution facilities the Company shall only connect (1) Company-owned lighting systems utilizing overhead circuitry or; (2) Customer-owned lighting systems utilizing underground circuitry or (3) Customer-owned lighting systems utilizing overhead circuitry attached only to Customer-owned poles except at the source.

#### LIMITED SERVICE:

- For Company-owned lights, service is available under this schedule for new high pressure sodium vapor ("HPS"), LED, Smart LED lights or metal halide ("MH") lights installed on existing poles and on new poles installed for purposes other than street lighting.
- For Company-owned lights, that are to be located in areas where the electrical distribution system
  and street light circuitry are located underground, service under this schedule is limited to existing
  lighting systems receiving service as of June 1, 1998.
- 3. HPS or MH lighting service will be discontinued when replacement HPS or MH lamps or luminaires are no longer available in the market. When such equipment is no longer available for purchase or has become obsolete, the Company may modify those luminaires to Smart LED lights and the Customer will take service as detailed herewithin.

#### 7. **TERMINATION:**

a. Once any remaining balance following termination is included in rates or otherwise utilized, the rate credit or charge under this schedule will not be applied to adjusted or corrected Customer bills.

#### 8. TRUE-UP AND NOTICE OF RATE CHANGES:

a. As provided in paragraphs 16 and 17 of Appendix C of Order 08 in Docket Nos. UE-111048 and UG-111049 (Consolidated), the initial tracker rates will be set in May, 2012. The rates in this schedule will then be reset annually and will become effective each January 1st. Each annual filing will be trued up for the actual deferred REC proceeds received to date, net of deferred taxes, at the end of the then-current rate period and the interest thereon versus the amounts assumed when setting the rates at the beginning of the period. The rates will also be trued up for any variances between the amounts set in rates and the amount actually passed back to Customers over the period due to variances in load. And, as provided in the Commission's Order in Docket No. UE-131276, the tracker rates effective January 1, 2014 will include the net biogas proceeds through October 31, 2013, of \$10.5 million, amortized over one year. The portion of the rates related to the biogas pass through will be trued up for any variance between the amount set in rates and the amount actually passed back to Customers during 2014 due to variances in load.
