POTS Translation Charge, per call
Call Handling and Destination
Feature Charge, per query
\$0.000000
\$0.000000

- [1] See Sheet 16-1 for applicable exchanges
- The End Office Dedicated Trunk Port rate was calculated based upon a 50/50 split between originating and terminating traffic using this flat-rated port. The FCC in their FCC 11-161 ICC Transformation order in section 51.907(d)(1) allowed Price Cap Carriers to use an equal split to divide the charge between originating and terminating elements. When the terminating portion of the rate is reduced and then combined with the originating portion of the rate a single flat rate is generated for billing purposes. The Originating portion of the DS0 is \$1.24 and the originating portion of the DS1 is \$.06.
