Please consider the future for our planet and our children that harnesses renewable energy sources such as solar and wind.

- 1) Reduce peak demand by requiring PSE to expedite and expand their Demand Response and Time Varying Rates programs.
- 2) Reduce price volatility and greenhouse gas emissions by requiring PSE to accelerate acquisition of new renewable clean energy resources.
- 3) Increase the resiliency of the electric system by requiring PSE to increase programs that encourage local solar and battery installations.
- 4) Reflect future capacity needs more accurately by requiring PSE to revise temperature modeling to reflect the changing climate and then resubmit their CEIP.

Thank you.
