This is in regards to UE 160918 & UG 160919.

The awesome short-sightedness of PSE and the supporters of the short term solution of the proposed LNG plant boggles the mind.

We, in the great EVERGREEN state would like to leave a resoundly close facsimile to what we (baby boomers) and our grandparents grew up with, to my and your grandkids. Short sighted agendas that have PSE and their fracking fraternity looking at building huge power plants with yesterday's technology (fossil fuels), not to mention a dismal ROI, are an unsustainable path that is negligent at best and criminal in some regard.

Following the current lunacy in the other Washington is not in anybody's best interest, unless you stand to reap the very tainted rewards of this bogus BS.

Think globally act locally

Thanks

Tom
