Would one of you please process these comments. I didn't realize that they came only to me.

Thanks.
Lisa

Subject: Docket Numbers UG-141169 and UE-141170

Hello, I would like to make my voice heard on the topic of the future of PSE. I am out of town and won't be able to be at the hearing. However, this is vitally important so I am taking time away from my family to write to you because the future of my children is of the utmost importance.

The future of our planet is dependent on doing whatever can be done to slow global warming. We are at a crisis point. Using coal and natural gas to supply power to our area is not a viable option. Especially when experts know that doing so is more expensive than utilizing renewable energy. It's tragic that the public needs to educate the power company to the fact that there are ways to provide power that lessen environmental impact.

Thanks for your attention,
Cathleen Blackburn
